DATE: 2000-2-15

ISO/IEC JTC 1/SC2/WG2

Universal Multiple-Octet Coded Character Set (UCS)-ISO/IEC 10646

Secretariat: JAPAN

TITLE:	**Proposal for Compatibility Ideographs**
SOURCE:	Tseng, Shih-shyeng (TCA)
STATUS:	Liaison member contribution
ACTION:	Suggested to put compatibility Ideographs into the ISO/IEC 10646 Part 2 Plane 2
DISTRIBUTION:	SC2/WG2 members and Liaison organizations

BRIEF STATEMENT

In the 37th WG2 meeting, Japan has raised the question of whether to add the CJK Compatibility Ideographs or not. Originally, TCA had proposed this idea on the 13th IRG meeting because of the round trip problem between TCA sources and ISO/IEC 10646.

The reasons that TCA propose characters for CJK compatibility support are the following:

- CNS 11643 has been published since 1992 as a national standard and is the source of ISO/IEC 10646.
- CNS 11643 has been implemented into our government information system such as residential, financial, driver license issuing system and many other large systems. It is actually been used in our daily life.

In the WG2 Copenhagen meeting, in response to Japan's question, WG2 member bodies had decided to ask IRG on its IRG meeting to discuss the need of adding CJK compatibility ideographs.
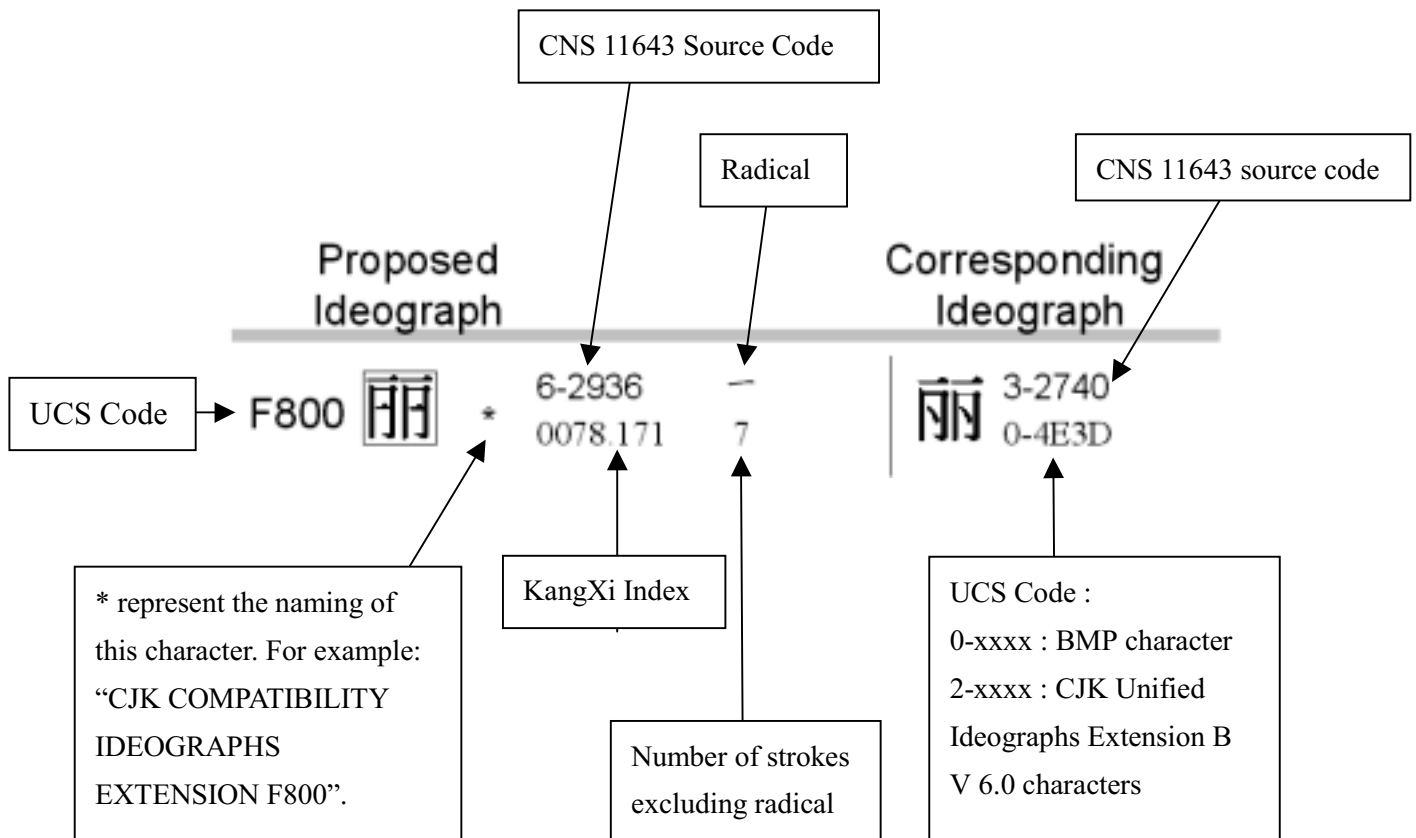

In the 14th IRG meeting, the result of decision had been made and is indicated in IRG document N710. According to this document, it states that

"IRG reconfirms the need to maintain the round trip conversion capability between recognized ideograph sources and ISO/IEC 10646. IRG would like to extend the Compatibility Ideograph concept to the expanded CJK repertoire by adopting the following principles…"

Based on IRG's conclusion and principles, TCA propose to add 517 characters as CJK COMPATIBILITY IDEOGRAPHS EXTENSION in ISO/IEC 10646 to meet the requirement of round trip conversion between TCA source and ISO/IEC10646. For each proposed character, TCA provide the needed information as IRG requested in IRG N710.

CJK COMPATIBILITY IDEOTRAPHS EXTENSION

The total number of glyphs for CJK compatibility ideograph support is 517. TCA would like to suggest that to allocate code positions from F800 to FFFF in ISO/IEC 10646 Part 2 Plane 2 as "CJK COMPATIBILITY IDEOTRAPHS EXTENSION" for including these compatibility characters.   The data item description for each proposed character and its supplementary information are the following,

Please fill Sections A, B and C below.   Section D will be filled by SC 2/WG 2.

A.   Administrative

1. Title: Addition of 520 CNS 11643 characters for compatibility

2. Requester's name: TCA

3. Requester type (Member body/Liaison/Individual contribution):   Liaison

4. Submission date: 2000-02-15

5. Requester's reference (if applicable):   CNS11643: 1992 (Chinese Standard Interchange Code)

6. (Choose one of the following:)
    This is a complete proposal: yes.
    More information will be provided later: yes.

B.   Technical - General

1. (**Choose one** of the following:)
a.   This proposal is for a new script (set of characters):   No
          Proposed name of script: _____
b.   The proposal is for addition of character(s) to an existing block: Yes
          Name of the existing block: _____ CJK Compatibility Ideograph _____
2. Number of characters in proposal: 520

3. Proposed category (see section II, Character Categories):   A

4. Proposed Level of Implementation (see clause 15, ISO/IEC 10646-1):   1
    Is a rationale provided for the choice?   Yes
        If Yes, reference: _____ Enclose _____

5. Is a repertoire including character names provided?:   Yes
    a.   If YES, are the names in accordance with the 'character naming guidelines'
        in Annex K of ISO/IEC 10646-1?   Yes
    b.   Are the character shapes attached in a reviewable form?   Yes
6. Who will provide the appropriate computerized font (ordered preference: True Type,
    PostScript or 96x96 bit-mapped format) for publishing the standard?
        TCA
    If available now, identify source(s) for the font (include address, e-mail,
    ftp-site, etc.) and indicate the tools used:
        96 dots bitmap

7. References:
    a.   Are references (to other character sets, dictionaries, descriptive texts etc.)
        provided?   Yes
    b.   Are published examples (such as samples from newspapers, magazines, or
        other sources) of use of proposed characters attached?   Yes

8. Special encoding issues:

Does the proposal address other aspects of character data processing   (if applicable) such as input, presentation, sorting, searching, indexing, transliteration etc. (if yes please enclose information):
        Enclose

C.   Technical - Justification

1. Has this proposal for addition of character(s) been submitted before?   No
     If YES explain

2. Has contact been made to members of the user community (for example: National
     Body, user groups of the script or characters, other experts, etc.)?   Yes
          If YES, with whom?   TCA , National Library, and some users groups
          If YES, available relevant documents?   CNS 11643:1992
3. Information on the user community for the proposed characters (for example: size,
     demographics, information technology use, or publishing use) is included?   Yes
     Reference: TCA, National Library

4. The context of use for the proposed characters (type of use; common or rare)   Common
     Reference: Use in residential and library system

5. Are the proposed characters in current use by the user community?   Yes
     If YES, where?   Reference: Enclose

6. After giving due considerations to the principles in N 1352 must the proposed
     characters be entirely in the BMP?   No, entirely in Plane 2
          If YES, is a rationale provided?
               If YES, reference:
7. Should the proposed characters be kept together in a contiguous range (rather than
     being scattered)?   Yes

8. Can any of the proposed characters be considered a presentation form of an existing
     character or character sequence?   No
          If YES, is a rationale for its inclusion provided?
               If YES, reference:

9. Can any of the proposed character(s) be considered to be similar (in appearance
     or function) to an existing character?   No
          If YES, is a rationale for its inclusion provided?
               If YES, reference:

10. Does the proposal include use of combining characters and/or use of composite
     sequences (see clause 4.11 and 4.13 in ISO/IEC 10646-1)?   No
          If YES, is a rationale for such use provided?
               If YES, reference:
          Is a list of composite sequences and their corresponding glyph images
          (graphic symbols) provided?
               If YES, reference:
11. Does the proposal contain characters with any special properties such as control function or similar
     semantics?   No
          If YES, describe in detail (include attachment if necessary)

D.   SC 2/WG 2 Administrative (To be completed by SC 2/WG 2)

1. Relevant SC 2/WG 2 document numbers:

2. Status (list of meeting number and corresponding action or disposition):

3. Additional contact to user communities, liaison organizations etc:

4. Assigned category and assigned priority/time frame:

ISO-IEC JTC1/SC2/WG2/IRG
Ideographic Rapporteur Group

<u>Compatibility Ideographs</u>

Source :   IRG
Meeting: Sybase, Singapore
Title :   The response to WG2 resolution M37.16: CJK compatibility
              ideographs from JIS (WG2 N2104)

IRG reconfirms the need to maintain the round trip conversion capability between recognized ideograph sources and ISO/IEC 10646. IRG would like to extend the Compatibility Ideograph concept to the expanded CJK repertoire by adopting the following principles:

a. There exist some ideographs in certain recognized sources as separate codes in their own source. But because of unification, they were not assigned separate UCS codes. To maintain the round trip conversion capability, separate codes have to be assigned to such ideographs in UCS. These are known as Compatibility Ideographs.

b. The inclusion of these Compatibility Ideographs should not affect the implementation schedule of part 2 of ISO/IEC 10646.

IRG has also discussed and resolved on the following issues during the IRG#14 plenary meeting:

i. Quality Control Issues:
    ✧ Submissions must be checked by the individual submitting member against

existing standards (CJK, CJK-A, CJK-B, CJK Compatibility)

- ✧ Japan, Korea, TCA, Vietnam and USA disagreed with China's proposal that submissions which have the same shapes as CJK radicals should be excluded. HKSAR and Unicode have abstained.
- ✧ The majority (except Japan) agreed that submitted ideographs with identical shapes from different sources should be merged.

ii. Newly submitted Compatibility Ideographs should have a collection name.

iii. The information needed to support the submission to assigned reviewers and/or WG2 for review and for the publication of ISO/IEC 10646.

Information	for assigned reviewers	for standard publication
Source set & code	yes	yes
Corresponding Ideograph in Unified CJK	yes	yes
Justification (per ideograph)	yes	----
96x96 bitmap	yes	yes
Kangxi index	yes	---
Attributes: radical; number of strokes (excluding radical)	yes	---

iv. The definition of recognized ideograph sources is currently limited to published National/regional Coded Character Set standards.
