Doc Type: Working Group Document**Title: Proposal to encode dominoes and other game symbols in the UCS****Source: Michael Everson****Status: Individual Contribution****Action: For consideration by JTC1/SC2/WG2 and UTC****Date: 2004-05-18**

The UCS contains a number of symbols used in games. Chess pieces, card suits, and Japanese shogi pieces have been encoded to enable their use in discussions of these games. The tiles used in the game *dominoes* have not been encoded; they are proposed here, as are playing card pips and the men and kings used in draughts/checkers.

Chinese tile games of the 12th century CE made use of tiles carved from bone or ivory with the indented pips made of ebony. The “tiles” are also known as “bones”, “stones”, or (apparently incorrectly) “dominoes”. The first recorded reference of the game in Europe is from the courts of Venice and Naples. There, the tiles were made by gluing and pinning two sheets of ebony on either side of the bone tile, which prevented cheating since the the pips could no longer be seen through the back of the tile if the bone or ivory were somewhat translucent. The standard or “double-six” set of dominoes is proposed here, as are the other sets – “double-nine”, “double-twelve”, “double-fifteen”, and “double-eighteen”. The last two are less common than the others, but this proposal is comprehensive and includes all of them. Note that domino fonts can be drawn as black tiles with white pips or white tiles with black pips; there is no distinction.

Figure 1. From Teun Spaans’ “Domino Plaza” web site (www.xs4all.nl/~spaanszt/Domino_Plaza.html), showing horizontal and vertical dominoes in text. The positioning of the horizontal and vertical tiles is significant, and can be maintained in plain-text fonts by positioning the glyphs appropriately with regard to the font baseline.

Keeping Track of the Tiles

It is important to be able to keep track of the tiles as the skeleton is built. This applies both to the played and unplayed tiles, and both your team's as well as your opponents'.

Consider again the lead player's hand in the first sample game:

Not only is he aware of the five 2s he has, he should also realize the 1-2 and the 1-3 are the missing 2s. As the game is played, he keeps looking out for their appearance. He should also try to get them played as quickly as possible, so he'll have the last 2s left (First Law—develop your strong suit).

Figure 4. Example from Lugo 2002, showing DOMINO TILE VERTICAL-02-06 used to indicate the chapter number (8).

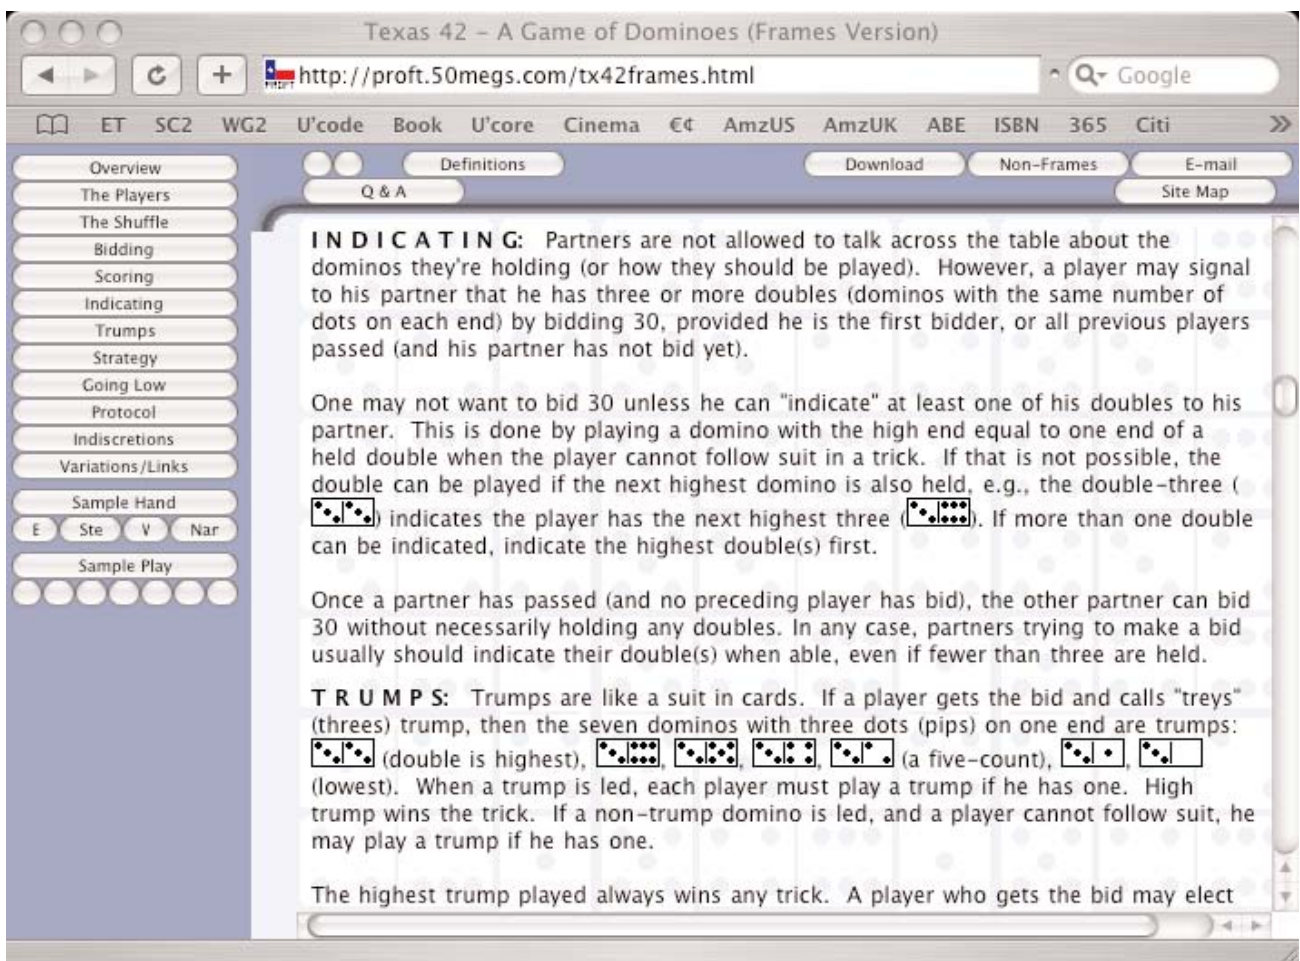

Figure 5. Part of the rules for the "Texas 42" dominoes game, from Paul Proft's web site.

Figure 6. A set of double-fifteen dominoes.

Figure 7. A set of double-eighteen dominoes.

Playing card pips and draughts/checkers characters are also proposed in this Plane 1 “Game Symbols” block. It should be noted that the I *have* seen similar plain-text presentation in several printed books on card-playing but I was not able to acquire them to make scans of them for inclusion in this proposal. See Figure 11 for an example of the use of the card suits with Latin letters as distinct from the use of card pips. While K♥ (King of Hearts) means the same thing as does ♥K (Herzen König) or R♥ (Roi de Cœur), these sequences cannot be “equivalenced” to the card pip .

Card game cribbage perfect hand or 29

Example of a cribbage perfect hand

I get emails about the perfect cribbage hand. Here is a perfect cribbage hand and the points.

You may just switch the jack and the matching 5 of the cut to get the 4 possible perfect cribbage hands. If the cut does not match the jack or you have a 10 value card instead of the jack, then you have 28 points only.

Your hand is  and the cut is  to match the jack.

The count is :

8 times 15 for 2 = 16 points

6 pairs for 2 = 12 points

1 for the matching jack = 1 point

Total -> 16+12+1= 29 points

Figure 8. Example from a Canadian cribbage site (www.cribbage.ca), showing playing cards used in plain text, between words and between parentheses.

Figure 9. Example from a divination web site (www.angelfire.com/biz/cardreading/card_meanings.html), where playing card pips are used in text. This is the same kind of context as that which was attested for some of the recycling symbols which have been encoded.

Figure 10. Example from the H. W. Caslon & Co. Ltd.'s *Printing types and catalogue of materials* (London, [1925]), showing the draughts/checkers men and kings along with the chess pieces which have already been encoded..
