Title: Revised Code Chart and Names List for the Modi Script
Author: Anshuman Pandey (pandey@umich.edu)
Status: Individual Contribution
Action: For consideration by UTC and WG2
Date: 2010-02-24

The Modi script was briefly introduced in the document L2/09-249R "Preliminary Proposal to Encode the Modi Script in ISO/IEC 10646". A formal proposal for Modi is currently being developed and will soon be submitted to the Unicode Technical Committee for review.

The code chart and names list for Modi has been revised. It is enclosed here and is intended to replace the versions provided in L2/09-249R.

The new code chart has been prepared using a digitized font for Modi, which was designed by the present author. The original chart was prepared using bitmapped forms of the Modi glyphs. The revised chart provides a more accurate representation of Modi characters.

The revision to the names list consists of changes made to the encoding order and character repertoire. Three characters have been removed: MODI OM, MODI DANDA, and MODI DOUBLE DANDA. These may be unified with the corresponding characters of Devanagari.

Comments regarding the character repertoire and letterforms are requested and may be submitted to the author at the email address given above. Any other information that may contribute to the project to encode Modi in the Universal Character Set is also requested.
