L2/16-311R WG2 N4812 2016-12-31

Revised proposal to encode Hanifi Rohingya in Unicode

Anshuman Pandey pandey@umich.edu

December 31, 2016

1 Introduction

This is a proposal to encode the Hanifi Rohingya script in Unicode. It supersedes the following documents:

- L2/12-214 "Preliminary Proposal to Encode the Rohingya Script"
- L2/12-278R "Proposal to encode the Hanifi Rohingya script in Unicode"

A proposal summary form is enclosed. The present document addresses comments made in:

- L2/16-037 "Recommendations to UTC #146 January 2016 on Script Proposals"
- L2/17-037 "Recommendations to UTC #150 January 2017 on Script Proposals"

2 Background

The 'Hanifi Rohingya' script is used for writing Rohingya (ISO 639-3: rhg), an Indo-Aryan language spoken by one million people in Myanmar (Rakhine State) and by 200,000 people in Bangladesh (Cox's Bazaar District). The Rohingya (تسلامينية *ruwainggya*, السلامينية *ruhainggya*) language is also spoken in other countries along the Indian Ocean because of the dispersion of the Rohingya community on account of persecution in Myanmar. In addition to the present script, three others are used for writing Rohingya: Burmese, Arabic, and Latin. The Arabic orthography is known as 'Rohingya Fonna'. The Latin adaptation, known as 'Rohingyalish', is based upon the English alphabet.

The script was developed by the Rohingya Language Committee in the 1980s under the guidance of Maulana Mohammed Hanif. The initial script approved by the committee is shown in the document in figure 2. The script is a modern construction and has no direct genetic affiliation to other writing systems. However, the influence of Arabic is evident in the general appearance and structure of the script, and some letter shapes are influenced by characters from the Latin and Myanmar scripts. The writing system is referred to by its users as a subcase automatic automa

There is limited information available on the Hanifi Rohingya script in English. Most of the materials on the script are written in the Rohingya language. The Rohingya Language Committee and the Rohingya Education Board Myanmar have published multilingual primers of the script (see figures 5–20). The script is used for the publication of books and newspapers, which are handwritten and printed. These sources show that a few Rohingya fonts have been developed for desktop publishing. The latest typefaces have been developed by Muhammad Noor.

3 Script Details

3.1 Structure

Hanifi Rohingya is an alphabetic script that is written from right to left. Consonant letters represent pure consonants. Vowels are expressed using letter-like signs, which are placed after a consonant. Vowel signs represent short vowels. Vowel length and stress is indicated using tonal signs, which are placed above vowel signs. An independent or word-initial vowel is represented using a vowel carrier and a vowel sign. Nasalization is indicated using a letter-like sign that is placed after a vowel sign. Consonant gemination is marked by a combining sign placed above a letter. Although letters are purely consonantal, a letter-like sign is often used optionally for indicating a bare consonant at the end of a word.

The script is structurally conjoining and is modelled upon Arabic. Letters join to adjacent letters at the baseline. In several hand-written and printed sources, the baseline between adjacent letters may not be completely connected. This is unintentional and is a result of casual hand writing or a limitation of font design. In texts printed using modern digitized fonts, the connections between letters are more consistently maintained.

Spacing is used for separating words. Latin and Arabic punctuation signs are commonly used for delimiting text segments, eg. periods, commas, colons, hyphens. The available sources do not show any specific linebreaking features, such as hyphens. An elongation feature similar to Arabic *kashida* is often used for justification.

3.2 Script name

The name 'Hanifi Rohingya' is assigned to the Unicode script block. This name has been selected because it precisely distinguishes the script from others that are used for writing Rohingya. Given that orthographies for Rohingya have been developed using other scripts, referring to the present script block using the bare name 'Rohingya' would present ambiguity.

3.3 Character names

Names for characters are based upon normalized Latin transliterations of Rohingya forms given in various script primers (see tables 1 and 2 for comparisons of names). In general, the proposed Unicode character names align with Latin names given for the majority of letters across the available Rohingya sources. In cases where there are multiple names for a character, an appropriate name has been chosen in consultation with the user community. Notes on the names for specific characters are given throughout the proposal.

For sake of brevity, the descriptor 'HANIFI ROHINGYA' is dropped when refering to Hanifi Rohingya characters, eg. HANIFI ROHINGYA LETTER A is referred to as A. Characters of other scripts are designated by their full Unicode names.

3.4 Transliteration

The transliteration of Hanifi Rohingya used in this document is based upon the Rohingyalish, unless specified otherwise.

3.5 Representative glyphs

The representative glyphs are derived from the "Rohingya Gonya Leyka Noories" typeface developed by Muhammad Noor. The glyphs are used with permission. Original glyphs have been modified and additional glyphs have been introduced by the proposal author.

4 Character Repertoire

The proposed repertoire for 'Hanifi Rohingya' contains 50 characters. There appears to be a one-to-one relationship between phonemes of the Rohingya language and the basic letters and vowel signs of the Hanifi Rohingya script (see figure 1). The encoded set may differ from traditional and scholarly inventories of script varieties that occur in written and inscriptional sources. Such differences naturally arise from the requirements for digitally representing a script in plain text and for preserving the semantics of characters.

4.1 Basic letters

There are 28 letters, as shown below with positional forms:

	Character name	IPA	Join	Fin.	Med.	Init.
J	HANIFI ROHINGYA LETTER A	/Ø/	left			J
J	HANIFI ROHINGYA LETTER BA	/b/	dual	J	J	J
و	HANIFI ROHINGYA LETTER PA	/p/	dual	٩	٩	و
J	HANIFI ROHINGYA LETTER TA	/t/	dual	J	J	J
J	HANIFI ROHINGYA LETTER TTA	/t/	dual	J	L	J
J	HANIFI ROHINGYA LETTER JA	/J/	dual	٦	٦	٦
٦	HANIFI ROHINGYA LETTER CA	/c/	dual	r	r	٦
୬	HANIFI ROHINGYA LETTER HA	/h/	dual	ھ	ھ	ھ
ک	HANIFI ROHINGYA LETTER KHA	$/\mathbf{x}/$	dual	ک	ک	ک

ڧ	HANIFI ROHINGYA LETTER FA	/f/	dual	ف	ف	ڧ
د	HANIFI ROHINGYA LETTER DA	/d/	dual	د	د	د
ھ	HANIFI ROHINGYA LETTER DDA	/d/	dual	ھ	لط	ط
J	HANIFI ROHINGYA LETTER RA	/r/	dual	L	L	٦
த	HANIFI ROHINGYA LETTER RRA	/t/	dual	ط	b	த
l	HANIFI ROHINGYA LETTER ZA	/z/	dual	l	T	l
٩	HANIFI ROHINGYA LETTER SA	/s/	dual	٩	٩	٩
೨	HANIFI ROHINGYA LETTER SHA	/ʃ/	dual	ઝ	٩	ھ
ط	HANIFI ROHINGYA LETTER KA	/k/	dual	ط	لمل	ط
Ŀ	HANIFI ROHINGYA LETTER GA	/g/	dual	٩	ي	Ŀ
J	HANIFI ROHINGYA LETTER LA	/1/	dual	L	T	J
lo	HANIFI ROHINGYA LETTER MA	/m/	dual	la	ھ	S
ட	HANIFI ROHINGYA LETTER NA	/n/	dual	ക	அ	ெ
ع	HANIFI ROHINGYA LETTER WA	/w/, /v/	dual	٤	٤	ع
ๆ	HANIFI ROHINGYA LETTER KINNA WA	/u/	dual	এ	এ	ๆ
٢	HANIFI ROHINGYA LETTER YA	/j/	dual	Ľ	Ľ	٢
ب	HANIFI ROHINGYA LETTER KINNA YA	/i/	dual	ŕ	ŕ	ب
¥	HANIFI ROHINGYA LETTER NGA	/ŋ/	dual	¥	X	X
ጉ	HANIFI ROHINGYA LETTER NYA	/ɲ/	dual	ŗ	L	ጉ

Only the representative form of a letter is encoded (left column in the above). This form is identical to the isolated or independent shape of a letter. The positional forms will exist as glyphs in a font and will be substituted for the isolated letters by the shaping engine (see \S 5.1).

Although consonant letters represent pure consonants, the character names follow the Unicode naming conventions for South Asian scripts derived from Brahmi. For instance, J is 'BA' not 'B'. This convention aligns with the transliterations for letters given in script charts and with the pronunciations of letter names in the Rohingya language. The letters J NGA and J NYA are also known as a a a and a a a a a a a b, respectively, and these names are specified as aliases in the names list.

4.1.1 Notes on letters

J A In script charts, the letter J is given Latin names such as *a*, *aa*. However, it does not represent /5/ or /a/ nor does it have an independent value. It is a consonant placeholder modeled upon U+0627 ARABIC

LETTER ALEF and functions as a carrier for vowel signs for representing independent or word-initial vowels. Although it may be appropriate to assign the letter a name such as 'vowel carrier', it has been given the name 'A' because of user preference.

 \bigcirc DA The \bigcirc is used in early materials for isolated and word-final forms of \bigcirc DA (see figures 5, 17). It inherently represents a bare consonant and cannot be followed by SAKIN. It is used in script charts (see figures 2, 5, 7) and in running text. However, as described in figure 3, \bigcirc was replaced by \bigcirc DA, \bigcirc SAKIN>, as seen in the charts in figures 6, 8, 9. This \bigcirc may be considered a glyphic variant of the ligature \bigcirc and may be represented by substituting the sequence \bigcirc DA, \bigcirc SAKIN> with a dedicated glyph in a font.

DDA The b is an older form of b DDA (see explanation in figures 3 and 4). It was revised into the present form in order to prevent confusion with other letters, ie. b RRA.

 J_{LA} The letter J_{LA} has a stylized version J in which the terminal is curled (see figure 5). When used, this form of LA appears only in isolated and final positions (see figure 16).

 \mathcal{L} MA This is the only letter whose shape changes significantly when it occurs in initial and medial positions. The vertical descender of \mathcal{L} MA is retained in the final and isolated forms.

ש אואא א The letter לאנא*a*, or "small *wa*", is used for representing diphthongs (see § 5.4).

ن KINNA YA The letter طيام *kinna ya*, or "small *ya*", is used for representing diphthongs (see § 5.4).

4.2 Additional letter

The following letter is also included in the repertoire, as shown below with positional forms:

	Character name	IPA	Join	Fin.	Med.	Init.
ۋ	HANIFI ROHINGYA LETTER VA	/v/	dual	ڨ	ڨ	ۋ

The letter $\dot{\mathfrak{S}}$ was created by some users for representing /v/ in the transliteration of loanwords, eg. for English "van" (see figure 18). It was not used widely and its usage has been discontinued. The letter \mathfrak{S} was is now used for indicating both /w/ and /v/. Nonetheless, the letter va is encoded in order to represent existing documents that contain the letter. This letter has been added to the repertoire with approval of the user community.

4.3 Vowel signs

The following five vowel signs are used for representing basic vowel sounds (see § 5.3):

	Character name	Value	Join	Final	Medial	Initial
9	HANIFI ROHINGYA VOWEL SIGN A	/ɔ/, /a/	dual	ک	ک	و
٦	HANIFI ROHINGYA VOWEL SIGN I	/i/	dual	Ŷ	Ŷ	۲

J	HANIFI ROHINGYA VOWEL SIGN U	/u/	dual	л	x	J
٦	HANIFI ROHINGYA VOWEL SIGN E	/e/	dual	۴	ŕ	٦
L	HANIFI ROHINGYA VOWEL SIGN O	/0/	dual	L	L	L

Indigenous names for these signs are لمفعل *a-for*, البغعل *i-for*, البغعل *u-for*, المفعل *o-for*, in which المفعل *o-for*, in which *if or* means "sign". These names are specified as aliases in the names list. The script does not have dedicated signs for long vowels. Instead, length is indicated using tonal signs (see § 4.6). In valid orthography, vowel signs can only occur after a letter, and never in initial position. However, the isolated forms appear in script primers for purposes of illustration.

4.4 Vowel silencer

Character name	Value	Join	Final	Medial	Initial
J HANIFI ROHINGYA S	AKIN —	right	L		

The sign SAKIN is used for indicating a bare consonant, usually when a letter is shown in isolation or after a letter at the end of a word (see § 5.2, and figure 16 for examples). The character name is based upon the Hanifi Rohingya spelling of the indigenous name: قصطيره sakin, also قصطيره sáakin. The sign SAKIN is similar in function to ° U+0652 ARABIC SUKUN. The SAKIN is a right-joining letter, and is only used after a letter in valid orthography. It is used in isolated contexts in script primers for purposes of illustration.

4.5 Nasalization mark

	Character name	Value	Join	Final	Medial	Initial
j	HANIFI ROHINGYA NA KHONNA	/n/	dual	ڼ	ند	j

The sign NA KHONNA is used for indicating nasalization (see § 5.5). The character name is based upon the Hanifi Rohingya spelling of the indigenous name: المدكفام na khonna. In valid orthography, the NA KHONNA can only be used after a vowel sign or a tonal sign. Although it could theoretically be used in word-initial position, such usage does not reflect actual phenomena.

4.6 Tonal signs

	Character	tone type
ب	HANIFI ROHINGYA SIGN HARBAY	short high tone
័	HANIFI ROHINGYA SIGN TELA	long rising tone
ॅ	HANIFI ROHINGYA SIGN TANA	long falling tone

These combining signs are used for representing tones (see § 5.3): The character names are based upon the Hanifi Rohingya spellings of the indigenous names: لمهمة لمن *tela*; لمهمة *tana*. In valid orthography these tonal signs can only combine with a vowel sign.

4.7 Gemination sign

Character HANIFI ROHINGYA SIGN TOSSI

The sign tossi is used for indicating geminated (doubled) consonants (see § 5.6). The character name is based upon the Hanifi Rohingya spelling of the indigenous name: لعقر *tossi*. The sign is identical in function to " U+0651 ARABIC SHADDA. In valid orthography, the sign can only combine with a letter.

4.8 Digits

There is a full set of decimal digits:

_	Character	Rohing	gya name	Value
0	HANIFI ROHINGYA DIGIT ZERO	ലേഷ്	shonno	0
I	HANIFI ROHINGYA DIGIT ONE	لبط	duy	1
ງ	HANIFI ROHINGYA DIGIT TWO	دىنلا	tin	2
2	HANIFI ROHINGYA DIGIT THREE	لېھ	chayr	3
0	HANIFI ROHINGYA DIGIT FOUR	لمصبك	fans	4
Ċ	HANIFI ROHINGYA DIGIT FIVE	فمنعد	ek	5
Ð	HANIFI ROHINGYA DIGIT SIX	فلا	só	6
Z	HANIFI ROHINGYA DIGIT SEVEN	همنالد	hánt	7
ю	HANIFI ROHINGYA DIGIT EIGHT	لمنعل	ansht	8
٩	HANIFI ROHINGYA DIGIT NINE	ക	no	9

5 Script Details

5.1 Shaping model

The shaping model for Rohingya is based upon that for Arabic. Each character is placed in the logical order in the input stream. For letters, the isolated form is substituted by the appropriate positional form. In the

examples below the 'input' column shows the input stream. The 'shaped glyphs' show the substitutions for each letter. The 'output' depicts the expected display.

Input \rightarrow	Shaped glyphs \leftarrow	Output ←
J ba, J ba, J ba	J+J+J	ມມ
Ь ка, Јта, Јва	$\mathbf{J} + \mathbf{L} + \mathbf{L}$	JIL
FA ف HA, J RA, ف FA	$\omega + c + \dot{c}$	مئف

In general, positional forms of letters are identical to their isolated shape. The difference is typographic: positional glyphs have edges at the baseline for facilitating connections.

The letter & MA differs from other letters because its isolated form is distinct from its initial form:

Input	Shaped glyphs	Output
\rightarrow	\leftarrow	<i>—</i>
to ma, to ma, to ma	a + a + a	lsss
9 SA, J LA, Co MA	L + L + S	ولما

There are sources in which the final form of \mathcal{L}_{MA} is rendered similar to the initial shape. Producing this form requires breaking regular shaping behavior using the generic control character [] U+200D ZERO WIDTH JOINER (abbreviated ZWJ). The ZWJ may be placed after MA to produce a final form without the ascender:

Input	Shaped glyphs	Output
\rightarrow	\leftarrow	\leftarrow
to ma, to ma	ta + s	lao
Co MA, Co MA, ZWJ ZWJ	ه + ه	مم

Only \mathcal{L}_{MA} has such distinctions in its positional forms. The zwJ should only affect this letter and it should be ignored if placed after other letters.

5.2 Usage of the sign SAKIN

Although consonant letters represent pure consonants, the script has the sign \supset SAKIN for indicating the absence of a vowel sign. The sign occurs frequently in script charts for representing consonants in isolated contexts. It is also used commonly in running text at the end of a word (see figure 16).

bJ $\langle J \text{ BA}, J \text{ SAKIN} \rangle$ pJ $\langle J \text{ PA}, J \text{ SAKIN} \rangle$ tJ $\langle J \text{ TA}, J \text{ SAKIN} \rangle$

The SAKIN is placed after a letter in the input stream. The occurrence of SAKIN in word-initial position should be considered orthographically invalid.

Usage of SAKIN is optional, and highly dependently upon user preference. There are no formal conventions regarding its use. Even in script charts the usage of SAKIN is inconsistent. For example, the chart in figure 8 shows SAKIN written with every letter (except for MA), including JA. On the other hand, figures 5, 6, 7 show SAKIN used with only certain letters, which are enumerated below:

J	J	BA	کد	ک	КНА	æ	ھ	GA
ور	و	PA	فد	ڧ	FA	لد	J	LA
J	J	TA	در	ى	DA	گد	ع	WA
J	J	TTA	قد	೨	SA	گ	ๆ	KINNA WA
هد	ھ	НА	പാ	ධ	SHA	بد	ڊ	KINNA YA

The SAKIN was introduced by some users after the script was developed. Indeed, the chart showing the finalized script as approved by the committee led by Maulana Mohammad Hanif in 1980 does not show SAKIN with any letter (see figure 2), except possibly with χ KINNA YA (χ).

5.3 Representation of vowels

Independent and word-initial vowels are represented using the letter **J** A followed by a vowel sign:

	Display	Input \rightarrow
а	لم	J A, ک VOWEL SIGN A
i	لړ	J A, ب VOWEL SIGN I
и	لىد	J A, مد VOWEL SIGN U
е	با	ل A, بر VOWEL SIGN E
0	لد	J A, ك VOWEL SIGN O

Non-initial vowel signs are represented with consonants in the same manner as with \mathcal{J}_{A} :

	Display	Input \rightarrow
b	J	J BA
ba	لم	J ba, ک vowel sign a
bi	لړ	J ba, ب vowel sign i
bu	لىد	J ba, م vowel sign u
be	رب	J ba, بر vowel sign e
bo	L	J ba, & vowel sign o

Vowel length and stress are indicated using tonal signs. A tonal sign is placed after a vowel sign in the input stream. A short high tone is indicated using \ddot{s} SIGN HARBAY as follows:

	Display	Input \rightarrow
bá	لم	J ba, \sim vowel sign a, $\stackrel{\flat}{\circ}$ sign harbay
bí	رې	J ba, ک vowel sign i, $\stackrel{{}_\circ}{\circ}$ sign harbay
bú	بت	J ba, ω vowel sign u, $\stackrel{\flat}{\circ}$ sign harbay
bé	بْ	J ba, الم vowel sign e, sign harbay
bó	لم	J ba, \mathfrak{s} vowel sign o, $\stackrel{\flat}{\circ}$ sign harbay

A long rising tone is expressed using the \circ sign tela, as follows:

	Display	Input \rightarrow
baá	لمُ	J ba, \sim vowel sign a, \circ sign tela
bií	ۯڋ	J ba, J vowel sign i, \circ sign tela
buú	ŵ	J ba, ω vowel sign u, $\acute{\circ}$ sign tela
beé	بْ	ل ba, z vowel sign e, \circ sign tela
boó	بر	J ba, \mathfrak{s} vowel sign 0, \circ sign tela

A long falling tone is indicated using the $\widetilde{\circ}$ SIGN tana, as follows:

	Display	Input \rightarrow
báa	لم	J ba, \checkmark vowel sign a, $\tilde{\circ}$ sign tana
bíi	ũ	J ba, J vowel sign i, $\widetilde{\circ}$ sign tana
búu	ũ	J ba, J vowel sign u, $\widetilde{\circ}$ sign tana
bée	ĩ	J ba, \mathfrak{z} vowel sign e, $\widetilde{\circ}$ sign tana
bóo	Ĩ	J ba, ${ m I}$ vowel sign 0, $ ightines$ sign tana

As is evident in the available sources, the placement of tonal signs may vary (see figure 15). The normative position is between the consonant and vowel sign. But, in some sources they appear above the vowel sign. Variation of placement may be considered a stylistic matter. Regardless of the position in the rendered output, in the in the input stream the tonal sign is to be placed after the vowel sign. The font should manage the proper positioning of the tonal signs.

Other stylistic issues regarding tonal signs include the size of the sign. The $\tilde{\circ}$ sign tank may be elongated to span the letter and vowel sign, as shown below. This is also to be managed in the font.

	Display	Input \rightarrow
báa	لم	J ba, \sim vowel sign a, $\tilde{\circ}$ sign tana
	تم	J ba, \sim vowel sign a, $~~$ sign tana

Although script charts show vowel signs in isolation without the vowel-carrier letter J A, these cases simply illustrate the character and are not depictions of valid usage (see, for example, figure 5). In valid orthography each vowel sign must be preceded by a consonant base. Multiple vowel signs on a single base are not considered valid sequences.

		Display	Input \rightarrow
bae	correct	لملب	J ba, \checkmark vowel sign a, J a, \checkmark vowel sign e
	incorrect	لمد	J BA, م VOWEL SIGN A, ب VOWEL SIGN E
bao	correct	لمله	${\sf J}$ ba, ${\tt s}$ vowel sign a, ${\sf J}$ a, ${\tt s}$ vowel sign o
	incorrect	لصگ	J ba, \sim vowel sign a, \mathfrak{L} vowel sign o

5.4 Representation of diphthongs

The letters \cdot KINNA YA and \mathcal{I} KINNA WA are used for representing diphthongs. The KINNA YA 'small *ya*' represents a semi-vowel glide (/j/, /i/) and KINNA WA 'small *wa*' represents the glide (/w/, /u/). They are placed after vowel signs to indicate a diphthong.

	Display	Input \rightarrow
bai	لمب	J BA, ح VOWEL SIGN A, ب KINNA YA
bau	لمك	J ba, \checkmark vowel sign a, ${\mathfrak I}$ kinna wa
bui	لىب	J ba, ب vowel sign u, ب kinna ya
bei	لېب	J ba, ب vowel sign e, ب kinna ya
boi	لعب	kinna ya ب Kinna ya
bou	II	${\sf J}$ ba, ${\sf B}$ vowel sign 0, ${\sf J}$ kinna wa

5.5 Nasalization

The *J* NA KHONNA is used for indicating vowel nasalization:

	Display	Input \rightarrow
baṃ	لمد	J ba, \sim vowel sign a, j na khonna
baṃb	لمنل	J ba, \sim vowel sign a, j na khonna, J ba
báaṃb	لمَنل	J ba, \backsim vowel sign a, $\widetilde{\circ}$ sign tana, \backsim vowel sign a, j na khonna, J ba

5.6 Consonant gemination

In the input sequence the 5 sign tossi is placed after the letter to be marked as geminated, but before a vowel sign, SAKIN, or NA KHONNA:

	Display	Input \rightarrow
bba	ٽم	J ba, ö sign tossi, م vowel sign a
bbaṃ	ٿمن	J ba, $\overset{{}_{\!$
bb	تّد	J ba, ö sign tossi, j sakin
gga	ڡۨڡ	ی SIGN TOSSI, م VOWEL SIGN A
ggáa	۳ عص	د BA, Ö SIGN TOSSI, م vowel SIGN A, Ś SIGN TELA

In general, the sign TOSSI is centered above a letter, as shown above. However, its graphical placement may vary depending upon the glyphic attributes of the base letter. If the base letter has a high ascender, the TOSSI may be positioned to the left. In such cases, the TOSSI would occur in the same position where a tonal sign would be placed. When both TOSSI and a tonal sign are present, the TOSSI is placed first and the tonal sign to its left. The logical input order does not change.

		tossi pos.	Display	Input \rightarrow
_	bbáa	above	ڵؙۄ	J BA, $\ddot{\circ}$ SIGN TOSSI, \sim VOWEL SIGN A, $\dot{\circ}$ SIGN TELA
		left	ؿ	J ba, $\ddot{\circ}$ sign tossi, \sim vowel sign a, $\dot{\circ}$ sign tela

5.7 Digits

As in Arabic, digits in the Hanifi Rohingya are written from left to right:

	Display	Input \rightarrow
01234	ดเจอต	0 zero, I one, 9 two, δ three, 0 four
56789	୯Მଅ୭୩	$oldsymbol{arphi}$ five $oldsymbol{\partial}$ six, $oldsymbol{\mathcal{Z}}$ seven, $oldsymbol{arphi}$ eight, $oldsymbol{arphi}$ nine

The Arabic style • U+0660 ARABIC DIGIT ZERO is attested as a glyphic variant for 0 ZERO.

5.8 Punctuation

There is no script-specific punctuation. The following characters are commonly used for delimiting various text boundaries (see figure 26):

- 4 U+060C ARABIC COMMA
- 5 U+061F ARABIC SEMICOLON
- 9 U+061F ARABIC QUESTION MARK
- . U+06D4 ARABIC FULL STOP

The available sources show some unconventional usage of ، U+060C ARABIC COMMA. For instance, figure 13 illustrates repetitions of U+060C ARABIC COMMA for indicating quotes, eg. , , , , (= "ya"). The last line of figure 17 shows another use of ARABIC COMMA for quotations in , Latter (= 'Borma').

The above marks of punctuation should be extended for use with Hanifi Rohingya. Common marks of punctuation include:

- . U+002E FULL STOP
- « U+00AB LEFT-POINTING DOUBLE ANGLE QUOTATION MARK
- » U+00BB RIGHT-POINTING DOUBLE ANGLE QUOTATION MARK

Rounded forms of these guillemets are shown in figure 15, in the heading: «٬» الماك لينك «٬» الماك الم

Both . U+06D4 ARABIC FULL STOP and the regular . U+002E FULL STOP are used commonly. In writing, the width of the full stop may vary from a dot to a dash.

5.9 Elongation

Elongation of the baseline connection between letters is commonly used in Hanifi Rohingya for justification and other spacing-filling purposes (see figure 14). This elongation is similar to the *tatweel* in Arabic. This feature can be implementing in Rohingya by using the _ U+0640 ARABIC TATWEEL. The ARABIC TATWEEL can be placed after any letter, vowel sign, or NA KHONNA in any position within a word. The elongation should not break across the end of a line.

لمل	$<$ J ba, \square vowel sign a, J ba $>$
تمـت	$<$ J ba, \square vowel sign a, . Arabic tatweel, J ba $>$
لمل	$<$ J ba, _ arabic tatweel, \sim vowel sign a, J ba>
لمـل	$<$ J ba, \square vowel sign a, . Arabic tatweel, J ba, . Arabic tatweel>

5.10 Collation

The sort order for Hanifi Rohingya is as follows:

6 Character data

6.1 Unicode Character Data

6.4 Script Extensions

The following characters should be extended for usage in Rohingya:

0640 ; # Lm ARABIC TATWEEL 060C ; # Po ARABIC COMMA 061B ; # Po ARABIC SEMICOLON 061F ; # Po ARABIC QUESTION MARK 06D4 ; # Po ARABIC FULL STOP

6.5 'Confusable' Characters

Some Rohingya letters resemble those found of Arabic. Attention to these 'confusables' is particularly important because Arabic is commonly used in Rohingya documents.

10D03 HANIFI ROHINGYA LETTER PA	;	0648 ARABIC LETTER WAW
10D07 HANIFI ROHINGYA LETTER HA	;	06BE ARABIC LETTER HEH DOACHASHMEE
10D08 HANIFI ROHINGYA LETTER KHA	;	06A9 ARABIC LETTER KEHEH
10D09 HANIFI ROHINGYA LETTER FA	;	06CF ARABIC LETTER WAW WITH DOT ABOVE
10D0B HANIFI ROHINGYA LETTER DDA	;	0637 ARABIC LETTER TAH
10D0C HANIFI ROHINGYA LETTER RRA	;	0637 ARABIC LETTER TAH
10D11 HANIFI ROHINGYA LETTER KA	;	0637 ARABIC LETTER TAH
10D12 HANIFI ROHINGYA LETTER GA	;	FECB ARABIC LETTER AIN INITIAL FORM
10D13 HANIFI ROHINGYA LETTER LA		0644 ARABIC LETTER LAM
10D14 HANIFI ROHINGYA LETTER MA	;	FEE3 ARABIC LETTER MEEM INITIAL FORM
10D19 HANIFI ROHINGYA LETTER KINNA YA	;	FE91 ARABIC LETTER BEH INITIAL FORM
10D1C HANIFI ROHINGYA LETTER VA	;	06A8 ARABIC LETTER QAF WITH THREE DOTS ABOVE
10D1D HANIFI ROHINGYA VOWEL SIGN A	;	FEBB ARABIC LETTER SAD INITIAL FORM
10D23 HANIFI ROHINGYA NA KHONNA	;	0632 ARABIC LETTER ZAIN
10D23 HANIFI ROHINGYA NA KHONNA	;	FEE7 ARABIC LETTER NOON INITIAL FORM
10D25 HANIFI ROHINGYA SIGN TELA	;	0654 ARABIC HAMZA ABOVE
10D26 HANIFI ROHINGYA SIGN TANA	;	0653 ARABIC MADDAH ABOVE
10D27 HANIFI ROHINGYA SIGN TOSSI	;	0651 ARABIC SHADDA

8 Acknowledgments

I extremely grateful to Muhammad Noor, who has provided me with numerous source materials and who has patiently answered my questions about the script over the years. I also thank the Rohingya Language Committee for responding to my questions. I am thankful to Mattias Persson and Ian James for bringing the Rohingya script to my attention some years ago. My efforts on this work would not have been possible without Lorna Priest, who introduced me to James Lloyd-Williams, who in turn provided copies of Rohingya primers.

The present proposal was funded in part by the Adopt-A-Character Program of the Unicode Consortium. A previous version was made possible in part through a Google Research Award, granted to Deborah Anderson for the Script Encoding Initiative, which funded a post-doctoral research position for me in the Department of Linguistics, University of California, Berkeley during 2015–2016. Preliminary research was made possible through the Script Encoding Initiative at Berkeley. Any views, findings, conclusions or recommendations expressed in this publication do not necessarily reflect those of the Unicode Consortium; the University of California, Berkeley; or Google.

A. Administrative	
1. Title: Proposal to encode Hanifi Rohingya in Unicode	
2. Requester's name: Anshuman Pandey <pre> andey @umich.edu></pre>	
3. Requester type (Member body/Liaison/Individual contribution): Expert contribut	ion
4. Submission date: 2016-12-31	
5. Requester's reference (if applicable):	
6. Choose one of the following:	
This is a complete proposal: (or) More information will be provided later:	Yes
B. Technical – General	
 Choose one of the following: a. This proposal is for a new script (set of characters): 	Yes
Proposed name of script: Hanifi Rohingya	165
b. The proposal is for addition of character(s) to an existing block:	
Name of the existing block:	
2. Number of characters in proposal:	50
3. Proposed category (select one from below - see section 2.2 of P&P document):	
A-Contemporary X B.1-Specialized (small collection) B.2-Specialized (large collection) C-Major extinct D-Attested extinct E-Minor extinct	
F-Archaic Hieroglyphic or Ideographic G-Obscure or questionable usage	
 4. Is a repertoire including character names provided? a. If YES, are the names in accordance with the "character naming guidelines" in Annex L of P&P document? b. Are the character shapes attached in a legible form suitable for review? 	Yes Yes Yes
 Fonts related: a. Who will provide the appropriate computerized font to the Project Editor of 10646 for publis standard? 	shing the
Anshuman Pandey	
b. Identify the party granting a license for use of the font by the editors (include address, e-ma Anshuman Pandey	ail, ftp-site, etc.):
 6. References: a. Are references (to other character sets, dictionaries, descriptive texts etc.) provided? b. Are published examples of use (such as samples from newspapers, magazines, or other s of proposed characters attached? 7. Special encoding issues: 	
Does the proposal address other aspects of character data processing (if applicable) such as presentation, sorting, searching, indexing, transliteration etc. (if yes please enclose information	
8. Additional Information:	
Submitters are invited to provide any additional information about Properties of the proposed Charact that will assist in correct understanding of and correct linguistic processing of the proposed charact Examples of such properties are: Casing information, Numeric information, Currency information, Directional I collation behaviour, relevance in Mark Up contexts, Compatibility equivalence and other Unicode n related information. See the Unicode standard at http://www.unicode.org for such information on or see Unicode Character Database (http://www.unicode.org for such information on or see Unicode for consideration by the Unicode Technical Committee for inclusion in the U	er(s) or script. Display behaviour behaviour, Default formalization ther scripts. Also Fechnical Reports

¹ Form number: N4502-F (Original 1994-10-14; Revised 1995-01, 1995-04, 1996-04, 1996-08, 1999-03, 2001-05, 2001-09, 2003-11, 2005-01, 2005-01, 2005-10, 2007-03, 2008-05, 2009-11, 2011-03, 2012-01)

C. Technical - Justification						
1. Has this proposal for addition of o If YES explain	character(s) been submitted before?	No				
• • • • • • • • • • • • • • • • • • • •	ers of the user community (for example: National Body,					
user groups of the script or characters, other experts, etc.)?						
If YES, with whom?	Muhammad Noor <mdnoorna@gmail.com></mdnoorna@gmail.com>					
	James Lloyd-Williams <james_lloyd-williams@kastan< td=""><td>et.org></td></james_lloyd-williams@kastan<>	et.org>				
	Lorna Priest <lorna_priest@sil.org></lorna_priest@sil.org>					
If YES, available releva	ant documents:					
	ty for the proposed characters (for example:					
size, demographics, information	on technology use, or publishing use) is included?	Yes				
Reference:	See text of proposal					
 The context of use for the propos 	ed characters (type of use; common or rare)	Common				
Reference:	See text of proposal					
Are the proposed characters in ci		Yes;				
If YES, where? Reference:	Speakers of the Rohingya language					
After giving due considerations to	the principles in the P&P document must the proposed character					
in the BMP?		N/A				
If YES, is a rationale	provided?					
If YES, reference	e:					
7. Should the proposed characters I	be kept together in a contiguous range (rather than being scatter	ed)? Yes				
8. Can any of the proposed characte	ers be considered a presentation form of an existing					
character or character sequer	nce?	No				
If YES, is a rationale	for its inclusion provided?					
If YES, reference	e:					
9. Can any of the proposed characte	ers be encoded using a composed character sequence of either					
existing characters or other pr	haracters or other proposed characters?					
If YES, is a rationale	for its inclusion provided?					
If YES, referenc	e:					
10. Can any of the proposed charac	ter(s) be considered to be similar (in appearance or function)					
to, or could be confused with,	to, or could be confused with, an existing character?					
If YES, is a rationale	for its inclusion provided?					
If YES, referenc	e:					
11. Does the proposal include use o	of combining characters and/or use of composite sequences?	Yes				
If YES, is a rationale for such	use provided?	Yes				
If YES, reference	Combining signs for tone marks					
Is a list of composite sequenc	es and their corresponding glyph images (graphic symbols) prov	ided? N/A				
If YES, referenc	e:					
12. Does the proposal contain chara	acters with any special properties such as					
control function or similar sem		No				
If YES, describe in d	etail (include attachment if necessary)					
	۲۰۰۰ ۲۰۰۰ ۲۰۰۰ ۲۰۰۰ ۲۰۰۰ ۲۰۰۰ ۲۰۰۰ ۲۰۰					
13. Does the proposal contain any I	deographic compatibility characters?	No				
	responding unified ideographic characters identified?
