A05. Man on the ground or in water
TLA attestation (PD) => A87
Note that the XIU example is actually a combination between this sign and the N16.
Hieroglyphize the hands touch the ground, n Jsekh kho or ksw 'bowing deep', not sn-tA and belongs to F0099/A87 (non-Asiatic).
Note that the XIU 4912 ligature, perhaps only valuable for Unicode horizontal. Not sure if it is degrees, but neither is is it 21)is not turned the full 45 (usually between 15° and 25°).
Question: in XIU 4912 this is the same TSL at bet:.
Beleg 1 has the twisted arms, but not the line (make separate sign?). Edfu VIII, 77,14, photo 0091 (image is smw. 'female mourner', not 'loose hair'. Not sure if ro' and ATTENTION tJpp. Nu is an interpreted cursive hieroglyphic sign, not a is more a standing form of A14 (no twisted arms, and line at the top, Hsm. T'50, harpist song i, col 11).
Man, standing, back slightly bend forwards, arms twisted together at the front on a downward angle, forwards from the head (braid, haircock).
Classifier to twist (sps).
All H&S/Hanulg tokens I could verify were F009D (A9D).
No sources given.
Redrawn into F00A5. (Redraw sign with the left arm hanging behside the body at the line 3 has a variant with one arm raised at the back. XIU 381, not sure of it (text might be a logogram for Cuse, but I m refers to a type of stone here).)
Man, on an incline line, one leg straight at the bottom, the other bend and raised, the top of the right arm holding behind the incline, left arm holding Beside the body at the back.
Phonemogram qis
redraw of F00A1 (A92A)

Man, written at an angle, right knee raised at slightly over 90° degree angle, arms extended forwards, with a knife with a triangular blade and straight handle (T30A) in the head, overthrow, to blade downwards.

Found and verified by Peter Dils. Dxw sign as F0086 (A92) but straighter, and with the arms a bit more extended forwards, with a knife with a triangular blade and straight handle (T30A) knife in its head.
Verified by Peter Dils, phonetic value this should have (xr,w/sh,w).
Man, written at a 45° degree angle forward, arms raised in front.
Logogram sxr (to cast down).
Exists, but can be activated by rotation of F0082 (457).
rotation of A15
Man, standing, back slightly bend forwards, arms slightly raised, both arms downwards, slightly bend, with the knee and toes of the left hand at the same level as the right leg.
Classifier bowing/mowing to the ground.
Man, prostrating, right leg extended, left leg bend and raised, both arms downwards, slightly bend, with the knee and toes of the left hand at the same level as the right leg.
Classifier bowing/mowing to the ground.
Man, standing, back bend horizontal, head hanging downwards, extended towards the front, fingers/hands at the same level as the feet.
Logogram xav/xsw (bowing down).
Note that in most cases it is rather difficult to differentiate between F00A4 (A37J) and F0099 (A87).

Note that I should take a look at some of the TLA TSL token for this sign is rather weak.

I don't think BM E3 574, line 5 (see attatched image) , carries an arrow, but rather a mace.

Deir el-Bahri, Temple[area, TT315, sarcophagus chamber, south wall, 16th col. from the right.

Man standing, with a feather on his head (tp), left hand holding a body-length wks sceptre (sceptre with a straight shaft, a forked base, topped with the head of the serh animal (Sh0)), left arm hanging beside the body.

Dendera Porte d'Hathor, p. 36,2, p. 104, krand.

This is the god Šw standing with wks-sceptre (šw as son of Rꜥ = šꜣ Rꜥw > value šꜣ "son"). Should we keep him here or remove him to categ[ry C "deities"?

Man, standing, with a palm branch, a round notch on front, with the stripped of leaves and a round notch on the head, right curve at the top backwards (Mh4), on the head, right arm in forward, holding a stick/staff, left arm hanging beside the body.

Caire CG 23182 (lstrap strkl).

Man, standing on a base (statue), right holding a stick/staff, which rests on the same base, left arm hanging beside the body holding a sceptre-head extending in front of the body.

Man, standing, wearing a long sash-kilt, with a one-piece shape on its head, right arm in front, holding a long sceptre-head with a body holding a sceptre (Sd2), right arm forward, holding a "scepter-like" sceptre-head (sr)

Note that the two tokens from T5L are a bit vague, need to add some Kemak material.

I have no idea where 𓂋^{E} belongs. I think it occurs, and 𓂋^{E} (Edfu VIII, 19.1, photo 0031 (krand)), seems to have a feather on its head.

I am not sure if the token is damaged at the head, or if it is intentional

Karnak example does not hold an ankh (unfinished?)

Badly damaged sign in Karnak, from a facsimile.

All Karnak tokens have the divine beard. TSL candidate (for divine beard). XU 704t (line 1) and XU 2511 (photo 6598) Note however that XU 2511 has damage over the heka staff at 4 spot it could theoretically be reconstructed as an ankh as well.

one token in Karnak with god's beard

Unicorn/ram. based on transcription and facsimiles only.

with longer beard below C2, C-06-001 (there should be only one beard length in the font, right?

same as A304G, A-30-019 but longer beard

TSL candidate, there is a distinction, as XU 2860 clearly has a long, curved beard. However, for Unicode I can agree that it might be wiser to only have either or (prereviously this one, as it is commonly used for 𓋹).

all other djeds with double crown are above under cat.

Token (Edfu VII, 16.3, photo (wall) 722) is too poor to see.

See comment regarding A301A

From TLA are from Griffith Rikh and Suk. I hesitate to base judgment on a transcription only.

Griffith, Rikh and Suk. pl. 6, col 262.

Y/i	KIU 731, line 19	Y (in core)		**Y**				Woman, seated, both knees up, with covered legs and arms, with long hair, and uraeus on the forehead.	Logogram I (first person singular).					
Y/i	BM EA 10554, sheet 46 (col. 52, line 7).	Y (in core)		**Y**				Woman, seated, both knees up, with covered legs and arms, with long hair, with a dotted line coming from the face which angles downwards.	Classifier youth (nxx).	Found and verified by AKU project. H&S did not provide a source for this specific sign.				Yes
		N (auto)		**N**						Jánrezeite II, p. 205-205, abb. 11 (166-167) is kneeling (i.e., closer to F06FB (B104).				
Y/i	Edfu I, p. 46,14, Edfu XI, pl. CCXXVIII (krand).	Y (in core)		**Y**				Woman, seated, both knees up, with covered legs and arms, with long hair, holding a tie or strap, used with sandals (ankh-sign, S34), which angles forward.	Phonogram T.	token is not transcribed as this form. KIU 2982, line 8 has a damaged form of this sign (classifier imn.t), so the sign is likely female, but could be F068A (B7B) as well.				
Y/i	KIU 5679, line 7	Y (in core)		**Y**				Woman, seated, both knees up, with covered legs and arms, with long hair, holding a sceptre with a straight shaft, topped with the head of the Seth animal, vertically	Classifier divinity (imn.t).	Uncertain, but seems to be there (I am not certain about the hair in the token, but as it is bound to a goddess, it seems likely).		Yes		
Y/i	Edfu VIII, 30,13, Bartels photo 0048	Y (in core)		**Y**				Woman, seated, both knees up, with covered legs and arms, with long hair, holding a flagellum (S45).	Classifier ruler (HqA.t).					
		N (auto)		**N**						JH-D token (Dendera XV, p. 112,8) could not be verified with an image.				
		N (auto)		**N**						No sources given.				
		N (auto)		**N**						JH-D token (Dendera X, p. 4,14, pl. 17) is not clear enough to recognise this sign.				
		N (auto)		**N**						JH-D token (Dendera XIII, p. 263,11) could not be verified with an image.				
		N (auto)		**N**						JH-D token (Dendera XIII, p. 288,13) could not be verified with an image.				
Y/i	Dendera XIV, p. 62,2, Commentaire pl. XXIV.	Y (in core)		**Y**				Woman, seated, both knees up, with covered legs and arms, with long hair, holding a cup	Logogram Hnw.t (mistress).	My image is rather poor, but seems to be there.		Yes		
		N (auto)		**N**						JH-D token (Dendera XIV, p. 19,1, commentaire pl. V) is not clear enough in my image to be certain it is this sign.				
Y/i	TSL	Y (in core)		**Y**				Woman, seated, both knees up, with covered legs and arms, with long hair, holding a stem of papyrus with a bud (M13).	Classifier divinity (srq.t)					
		N (auto)		**N**						No sources given.				
		Y (>=D,JSeh/HG)		**N**						(Dendera IV, p. 179,11) could not be verified with an image. JH-D/Cauville token (Dendera X, p. 36,6, pl. 27, col. 63) is too damaged to be recognised. JH-D token (Dendera XV, p. 6,11, commenaire, pl. IX) is way too poor to see the sign. H&S refers to WB II, 107, which is F0713 (B65), i.e., the kneeling form (see source F0713 (B65). Dendera X, p. 419,10, pl. 274 has a variant with both knees down. p. 470, but in the TLA the slips only support the form of KIU 6521, line 5, which is a variant of F0713 (B65) with one knee raised, not this arm position. (other tokens are simply A2).				
		N (auto)		**N**										
Y/i	Drioton, RdE 1, p. 5, pl. I, col. 5.	Y (in core)		**Y**				Woman, seated, both knees up, with covered legs, with long hair, with a cup/vessel (W10) on her head, rigth arm forward, supporting the cup/vessel at the front, left arm hanging beside the body while up, with covered legs, with long hair, arms raised in front, hands near the hight of the face, handpalms	Phonemogram f					
Y/i	Vandier, Moalla, p. 220 (IV,7), pl. XIX.	Y (in core)		**Y**					Classifier woman (Hm.t).	Verified with an image from Philipp Seyr. (the upwards tick on the arms is there, but barely visible.)

Damaged, but there seems to be a \tZ? there. Edfu VIII, 143.5, Edfu XIV, pl. DCLXXV (no longer visible in 1959). However, there is no real sign left of the hhumanoid.

for the cartoutches of Ptolemy XII. being 3 (P. Alatsitsi I, 3,4 (BM EA 10247,2) is damaged, but seems to hold something.

is C12B with the teather in the opposite direction (TSL candidate (data)). being 1-2 are both to damaged to be that they hold something (which would be the room for the cartoutches of Ptolemy XII). being 3 (P. Alatsitsi I, 3,4 (BM EA 10247,2) is damaged, but seems to hold something.

Y (in core)	Dendera X, p. 97, pl. 13, second image above second figure from the right.			Y				knees down, with a long curved beard and long wig/hair; with a dump of three papyrus flowers (M16A) on its head, both arms forward, hands at the hight of the chest, holding a tray or reed mat, with a tall water-pot, with spout, with line of fluid coming from the spout (W15A) on top of it, with the spout at the front.	logogram hapy (the flood).						
Y (in core)	Edfu VII, p. 16,1			Y				An intyphallic god, with long, curved beard, standing on a platform, wearing a double plume headdress, with a line coming from the back of the head, running down to the base, arm raised in back, with a flagellum (S45) written over the arm. In front of an altar/table with two conical shapes (tree or bread) and a flower (M16A?).	logogram mnw (shn).			Verified by image of Philipp Seyr: items on the altar/table/shrine are not the cleanest.			
Y (in core)	KU 3621, line 2			Y				knees down, with a long curved beard and long wig/hair; with a dump of three papyrus flowers (M16A) on its head, both arms forward, hands at the hight of the chest, holding a tray or reed mat, with a tall water-pot, with spout, with line of fluid coming from the spout (W15A) on top of it, with the spout at the front, and stem (M9/rotated M133) written over the water pot.	logogram hapy (the flood).						
Y (in core)	KU 4294, line 17			Y				knees down, with a long curved beard and long wig/hair; with a dump of three papyrus flowers (M16A) on its head, both arms forward, hands at the hight of the waist, holding a tall waterpot (W14).	logogram hapy (the Nile/the flood).						
Y (in core)	KU 4197, line 5			Y				knees down, with a long curved beard and long wig/hair; with a dump of three papyrus flowers (M16A) on its head, both arms forward, hands at the hight of the waist, holding a tall waterpot. with fluid coming from the spout (W15A), with line of spout at the front.	logogram hapy (the Nile/the flood).			Although not completely clear in the token, the iconography proves the breasts and the beard.			M16 on the head

F0C5F					I have no idea where this is attesed, and I wonder if its inclusion is of any use, when taking C9A into regard.						Y/i	Dendera Porte d'Hathor, p. 2,15, p. 70 (bandeau)	Y (in core)		**Y**				Goddess, seated, knees up, with covered legs and arms, with a headdress of bovine horns with a sun disk (F102), holding a stem of papyrus with a bud	Logogram/phonogram nb.t (lady).	Exists, but one could doubt the value beside F0C57 (C9A).			Yes	
F0C60			Y								Y/i	Dendera Porte d'Hathor, p. 2,15, p. 70 (bandeau)	Y (in core)		**Y**				Goddess, seated, knees up, with covered legs and arms, with a headdress of bovine horns with a sun disk (F102), holding a tie or strap, used with sandals (ankh-sign, S34), vertically at	Logogram anx (life).					
F0C61											Y/f	Philae II, p. 4-5, line 15.	Y (in core)		**Y**				Goddess, seated, knees up, with covered legs and arms, with a headdress of bovine horns with a sun disk (F102), holding a chisel	Logogram/phonogram mnx (effective/splendid).					
F0C62													N (auto)		**N**										
F0C63													N (auto)		**W**						Both tokens I have are technically variants (Dendera, porte d'Isis, p. 33,12, pl. 41, bandeau has the shrine form of sistrum, but no loops at the side; Dendera Porte d'Hathor, p. 23,10, p. 92 uses the Y18 sistrum type).			Wait	
F0CA5											Y/i	Dendera Porte d'Isis, p. 33,12, pl. 41, (bandeau above the scene).	Y (in core)		**Y**				knees up, with covered legs and arms, with a headdress of bovine horns with a sun disk (F102), holding a sistrum, with the top piece in the form of a shrine, with the human face on the handle having hair (Y28)	Logogram nb.t-sSS.t (mistress of the sistrum).	F0C63 with a F4541 (Y28) type sistrum.			Additional row	
F0CA6											Y/i	Dendera, Porte d'Hathor, p.23,10, p. 92.	Y (in core)		**Y**				Goddess, seated, knees up, with covered legs and arms, with a headdress of bovine horns with a sun disk (F102), holding sistrum, with horizontal wavy lines over the top piece (Y18).	Logogram nb.t-sSS.t (mistress of the sistrum).	F0C63 with a F4532 (Y18) type sistrum.			Additional row	
F0C64													N (auto)		**N**						JH-D token (Dendera XIII, p. 199,11, Commentaire pl. XXXVI), my image is too poor to recognise the sign, or what it is holding.				
F0C65													N (auto)		**N**						JH-D token (Dendera XIII, p. 381,10) could not be verified with an image.				
F0C66													N (auto)		**N**						JH-D tokens (Dendera XIII, p. 249,3; 384,4) could not be verified with an image.				
F0CA0											Y/i	Dendera, Porte d'Horus, p. 25,2, p. 109.	Y (in core)		**Y**				Goddess, seated, knees up, with covered legs and arms, with a headdress of bovine horns with a sun disk (F102), holding a string wound on a stick	Logogram Hm.t (majesty).	It is possible that the V24 should be considered a T3 instead.		Horus 25,2		
F0CA7											Y/i	Die Ägypten-Sammlung des Museum August Kestner und ihre (Kriegs-)Verluste, Rahden/Westfalen 2011, 130 (Kestner Inv.-Nr. 1970.37, Tb Brocklehurst)	Y (in core)		**Y**				Goddess, seated, knees up, with covered legs, with a headdress of bovine horns with a sun disk (F102), with one visible arm, extended forwards, holding a flagellum (545).	Classifier divinity (Hwt-Hr).	Found and verified by Peter Dils.			Additional row	
F0C67											Y/i	Dendera Porte d'Hathor, p. 7,7, p. 75.	Y (in core)		**Y**				Goddess, seated, both knees down, with a headdress of bovine horns with a sun disk (F102), both arms forward, right hand at the hight of the shoulder, holding a tambourine, left hand on the tambourine.	Logogram nhm (rejoicing).	Verified by Peter Dils. Might be there in Dendera Porte d'Hathor, p. 7,7, p. 75, but it feels like I see it because I want to see it, rather than it being clearly there.			Yes	
F0C68											Y/i	Dendera Porte d'Hathor, p. 31,10; 15, p. 119, left image, 1st and 3rd bandeau.	Y (in core)		**Y**				Goddes, standing, with a headdress of bovine horns with a sun disk (F102), both arms forward, right hand at the hight of the shoulder, holding a tambourine, left hand on the tambourine.	Logogram nhm (rejoicing).	nhm could be considered playing the tambourine here.				
F0C69													N (manual)	**N**	**N**						Redrawn into F0L8A. (Redraw sign as B5 with the Hathor crown.)				
F0C6A											Y/i	Dendera Porte d'Hathor, p. 33,8, p. 101	Y (in core)		**Y**				Goddess, seated, both knees down, with a headdress of bovine horns with a sun disk (F102), nursing a child, seated on her lap, left arm forward, hand over the chest of the goddess, right arm hanging beside the body; right arm forward, embracing/holding the child, left arm over the chest.	Classifier to nurse (ATi).			redraw request for C152 is F0C6A		
F0804											Y/i	Dendera, Porte d'Hathor, p. 37,12, p. 105.	Y (in core)		**Y**				Woman, seated, both knees down wearing a headdress consisting of a sundisk between bovid-horns, with a seat on top of the sun disk; nursing a child, seated on her lap, left arm forward, hand over the chest of the woman, right arm hanging beside the body; right arm forward, embracing/holding	Logogram rr (to nurse, to rear (from rnn)).	**Redrawn and replaced and moved.** (Redraw. Child is on lap, being nursed, not in this position. redraw as B5 with the crown as depicted here).		Hathor 37,12; redrawn in place

V/MUT IL	DIFF	Note that Meterne uses a variant with the stick in the middle (M1, M/C medVel 73, MIRAO 140, fig. 26 (second column from the left).	attestation from Neirn pyramid is a different sign, as (if the transcription is correct (jaguar, teeth, pi, XXIX, col 253) the V28 is part of the sign (mutilated variant of A413). Karnak code sequence with D64 is used to write D.t (eternity).	Y	(>=D.JSeh/HG)		N																
V/MUT IL		Karnak code sequence with D.t (eternity).							2														
V/MUT IL		transcription to me, r1 1958.b (N). Sethe column 763. need to see squeeze of photo (pref. both). See Sethe 3, plate between p. 155 and 156. Steliches wnder der wand XXXI. there represented with only one arm.							2

r 11A attestatio ns read two signs here, but I am not sure about the reading here, but it might be a monogram. Can't say for unicode if it should be an overlay or not.

N?

Note that if was encoded as CSKE in TSL here to look up in how far there is indeed a OK unique function.

Y

note that the majority of the other attestations in Karnak are simply D38. Hence, I would consider this sign a case of D38 as best (based on the functions attested in Karnak).

Y

Two arms, connected at the shoulders, spread sideways, forearms horizontal, with the palms facing downwards.

Two arms, connected at the shoulders, spread sideways, forearms horizontal, with the palms facing upwards

Exists (although attested under F113C (D34b) in JH-D), but I doubt it is useful to include all D34 variants in Unicode.

Uverlay. Jrt-r token (uncertain (left image)) is difficult to see, but I doubt that F114d (D372) would not serve for this sign as well.

Uverlay. Jrt-r token (Esna VI 387,5; p. 111,9, verified by Peter Dils) could no longer be recognised. Uverlay. No sources given. but probably has to become atomic. JH-D token (Dendera XV, p. 222,12, verified by Peter Dils) has the X1 above the arm itself, not within the hA sign (i.e., simple insertion).

3			Y/MUTIL	DIFF	PT 804b is a different sign than depicted here, as the hand is more horizontal (see attached image, replace D264 image with this one?), PT 804b, Sethe column 79, See Berlin image (P/F/W A14). TSL candidate (mutilated form classifier to call (nis). Karnak code represents something in the palace façade name of Philippe Arrhidée.

6		cf. D239, D241	?	DIFF	I think these signs (D238, D239, D241) require separate study, as the form seems somewhere between D238 and D239, but the function is at least classifier for xrp. The Unas example holds a different object (which would require a new sign in TSL, see PT 227b (U), Piankoff pl. 68, 8th col from the right.) It might be wise to combine D238, D239 and D241 as one entity.					
11	Y	cf. D250; cf. D238, D241	Y?	DIFF	PT 820d (P) W 426, holds an form of a brush (see classifiers of the other pyramids). TLA examples interpretate this as Dsr, and I consider the form simply D46, rather than D239. Form in Merenre (PT 866b) is a lot less distinct than Sethe suggests (based on MIFAO 140, pl. III (M/F/E 55).					Merge with D238
7										
2										
5	N		Y	DIFF	I got ony one exampe from the TLA, Edfu VII, 51,1-2, and I don't think that the sign is distict enough from D46 to require a different entry.

Not in TSL! Sgn seems to be an misinterpretation. see Nawille, Dict et-Bâtnt, vol. 4, pl. CXVI, rightmost column

TLA example (Edfu VII, 88.16-17 is a wrig in my opinion). I could not locate the 8F exemple.

Belegt 1 (Edfu VII,5.1.7-17, photo (wall) 310) is D46A. as is belegt 2 (Edfu VII,52.6-8, photo (wall 310).

I am not sure if the PF 1051 based on MIFAO 118, pl. IX, fig. 17/8

Not sure if this sign (f) is actually this sign, but it is certainly found in Dendera X, p. 282,7, pl. 166, col. 4.

Y/I	XII 483&, line 11	Y (vS.2)						N (auto)			N	Y				A bovid (cow), lying down, legs folded beneath the body, tail down, with the head and front legs of a calf protruding from the cow.	Classifier cow (ln.t, cow of the sky).	I am not sure if both E17A and E10O should be included in Unicode. Nonetheless, suggested token here is beyond a doubt functionally female.

E17A, I doubt that we can find clear graphical distinction based on gender, so I would suggest colliding Any distinction is in my opinion based on context, rather than graphical aspects. (moreover, in XII 394, the sign is encoded for nb-tA.wy, so there is no female aspect at all) For unicode I would suggest only keeping this sign, and not include E17A.

toxem. nowever, in tne token there is sometning at position of the sgm does suggest that the sign is longer than can be clearly seem

the back of the cow, and the although the horns are less distinct.

note that there does not seem to be cultic image idea behind this, which is the case with E23I.

394, nne 421 the legs are crossed over (bound). I would transcribe E17& here.

	what is this?	?	DIFF	the OK form of the nm-knife (T35, see Unas examples of how close to a tusk this can look). PT 1432a is damaged in both P and N, and based on the function (to bend), if it is not a finger or something else, However, this sign might fit, as the spell discusses the bull of the sky bending its horn. Nonetheless I prefer to not include this sign.					
				Beleg 1 is a cursive variant of F19, I don't think it is this sign however (see BIFAO 65, pl. XIX, column 110, line 31). Turin BotD, chapter 26, col 3 is a different sign althogether. Without a hieroglyphic example, I do not feel comfortable including this sign.					
		Y		I could not locate the PT example exactly, but it was used as part of three different classifiers of a.t, so whatever was written should be considered a piece of meat. See my comments at F18A and F18B.					
				Problematic sign, attested before the Ptolemaic period, but is more prevalent in the Greaco-Roman period. Functionally, it could be either a variant of F20 (ns), H25 (dqr) or V12 (arq) (among others). For the TSL, we will retain the 3 different signs (although most likely classes), in case there is a graphical variation (I have not yet seen one, but it is possible, however, I assume that the distinction will be made functionally rather than graphically).					
	shape very similar to H27 and V012A (which is mistakenly in section V)	N?							
				All TLA examples (Edfu) are Ff4.					
				Some tokens of TSL F21 are already Ff4.					
				Note that the exact form of the standard varies.

F1A31	F-22-002	what is this?	Y	DIFF		It is a less detailed form of a tail (F33). However, in this form it is graphically identical to N20, and as Gardiner placed the phono-repeater sd under N20 as well ("From O.K. onward a sign of like appearance is used in Hb-sd'jubilee"" (Gardiner, p. 488)), I don't think we should have both F33B and N20. However, I could always move the sd tokens of N20 to F33B, and make it a class of F33.					
F1A33	F-22-004						Uncertain, KIU 2479, line 16, the central oval is more enclosed in this token (and functions as W7A).				
F1A40	F-23-001					Exact form is extremely variable.

F1A04	F-20-038			N (auto)		N						Cauville token (Dendera III, 119,7, pl. CCXIII, krand) might have the lines like F31 a bit straighter, but nowhere near as extreme as here. Unlikely to be a meaningful variant for Unicode. I have no access to Athribis D3,20, line 21.

F1A07	F-20-041			N (auto)		N						survey of the attestations, I see no reason not to simply use F1A03 (F31) in the JH-D tokens (none show the broad oval at the top, nor is it functionally different).

Logogram bA (soul).	be verified with an image (Dendera XIII, p. 235,3; 354,11; 397,2). Dendera XIII, p. 350,11, Commentaire pl. LVI is not visible in my rather poor image. Verified with online image (https://gaulsmit.smugmug.com/Features/Africa/Egypt-Dendera-temple/i-oXZzF8q/A). redraw with the head not at an upwards angle, but G39 with the open mouth. None of the tokens I could verify (Dendera X, 15,10 (pl. 21); 328,1 (pl. 215); 332,3 (pl. 216) where clearly this sign, it was either a normal G39 (15,10), or a bird that based on the body looked more like G33 (328,1; 332,3). None had the mouth clearly open either.				
		Y (>=D,JSeh/HG)		**N**									Redraw in a new row.	
y/i	Uenǧera X, p. 15,9, pl. 21. (verified with photo HAdW A3874).	Y (in core)		**Y**				A pintail duck (Anas acuta), with the beak open.	Phono-repeater Htm.

F1CCA	Y	TSL token different: not picking foot	N	DIFF	but I think that when this was encoded, the key features were the 'raised' leg and the downwards head, not the exact position of the head and the leg towards each other (as the bird is not picking, as it is dead bird offering), nevertheless, I have no objection to leaving it out for the moment.

F1CD7			Y		However, it could be argued that the N25 and N37 are actually part of this sign, as if an adaptation of G216B. (see attached image). In Edfu there are examples of this sign above N37 only, which should probably become its own sign in TSL, although I do not know if it is valuable for Unicode.

F1CDA	Y			DIFF	In the PT examples, the bird is not sitting on a X8, but rather R91, for example, see PT 287b (U), Piankoff pl. 15, column left of the entrance. (bird is a bit different here, but in the other PT examples the perch is this form, i.e., F1CD8 (G32)).

				KIU 1128, line 16 has a variant without a standard. I could not locate this specific grapheme.					
				Could not yet locate an example.					
N	monogram	Y	DIFF	Probably here, Macadam Temple of Kawa I, pl. 9-10, line 2 and 4, athought the only thing that distinguishes it from G175 is that it is a lot less duckllke, Moreover, I would prefer only including G165, as this full falcon form needs to be attested, and based on exisiting encodings, I would prefer only including G165.					like a hieroglyphic standardization, while G165 is closer to the palaeographic /iconic rendering. Agree with keeping only the latter.
N	monogram	Y	DIFF	I could not locate the PT example (PT 1583b, sethe column 798, not visible in MIFAO 118 (P/C-post/W). The TLA examples (all by Grunert) are all G7.					could not verify this shape.
				it seems to be there, but only in facsimile. ACEr 18 (Giza II), pl. 46, line 7. However, as the Merenre example of G142 is only with three lines, one can wonder if the G142 and G143 are not the same sign, rather than two distinct signs.					
		?							
				TLA are from the tomb of Pahesi, ÄAT 23, and in my opinion are a variant at best of G133 (see my comments there, although a bit more rounded). The sign is in Pahesi used for the title nb.wy (i.e occurs in dual), and if this specific (with egg) actually exists, I would expect it to be sA-Hr (son of Horus) or sA-nTr (son of the god). Hence, if the Pahesi form would be added (TSL only), it should recieve its own grapheme, not using G114.					Merge with G133
				Note that in Edfu the wings are habitually more horizontal than in this image (however, I suggest continuing using this form).					
Y				Only in transcription, PT 1770a (N), Sethe column 157, needs verification with squeeze. However, based on Sethe it seems that both wings are downwards (classifier ann), and the bird looks more like G37 than G5.					
				Note that PT 1658 (D), Piankoff, pl. 3, 6th col. from left (distinct from G40, which occurs in the same column) is a variant of this sign, with the legs like G40.				
Y				The photo is too poor to see with certainty, but PT 1971 (N), sethe column 759 does not look to dissimilar from G40 to me. (check squeeze)

			insignificant(?) variant	N	DIFF	As we made distinctions between the position of the leg before, I would not call this insignificant. (although functionally it most likely is). However, as the only accessable source to me is P. Turin (BotD), one could wonder if the variation in leg position is not a quark of the cursive used, see: chapter 125, col 30,2.			for systematicity re the position of the legs
		Y							
			Y/BREAST FEATHER	N	DIFF	In all attestations (Karnak and Sehel, the TLA token), I would rather call them G176A, as there is no internal detail, nor the double line at the back.			
			cf. G176; insignificant difference	N	DIFF	Functionally distinct form used in Ptolemaic, without inner detail. I would call all Karnak tokens rather G176A over G176.

F2011			?	DIFF	TSL token fro H18 is actually H18A.					
F2012										
F2013			Y							
F2014			Y							
F2015	Y		Y		Only attested in Hieratic (to my current knowledge), I don't feel comfortable including this sign based only on Hieratic transcription convention (see Moeller III, p, 21, nr. 234). However, I understand if it needs to be added.					because of hieratic sources that need such a grapheme.

F2030		r(not) same bird as H2 and/or H2A?	Y		Not the same bird, crested ibis (G25). (based on the function, Ax)					
F2031		cf. H002 (same brird? compare beaks)	?	DIFF	Beak difference in Hieroglyphica, neck difference in Jsesh. I could not access the TLA tokens for some reason, but the Karnak token does not look significantly distinct in my opinion.

F2069	R	what is this?	Y	DIFF	A wing, without detailed feathers, in the position as if held by a human/bound at the wings. Beleg 1, Edfu VII, 82,5-7, photo 256 is more likely a D50A, than H5B (partly based on the function, an(.t). None of the PT examples really fit this specific form either. (I would have placed them, and in the case of Unas, under H5), the PT 1048c (P), the wing is straight, without feather detail.

F2014	y/i	Edfu VIII, 135,7, Bartels photo 0182.	Y (in core)		Y				The head of a bird, with its mouth open, neck straight.	Logogram 0d (to speak, to say).	Border between F2011 (H18A) and F2014 (H18) can be rather vague.				
F2015	y/i		Y (in core)		Y				The head of a bird, with its mouth open, neck straight, with a loop of cord with the ends forwards around its neck.	Phonemogram pg.	Hieroglyphic representation of a Hieratic sign, not attested outside Hieratic.		~~

F2065			N (manual)	N	N										
F2066			Y (>=D,JSeh/HG)		N						Meaningless distinction from F2064 (H5), slightly more natural looking wing.				
F2067			N (manual)	N	N						Duplicate of F2066 (H5A).				
F2068			N (auto)		N						Valeurs token (Daumas Mammisis Dendera, p. 24,6) could not be verified with an image, and had an additional curve at the top (to resemble H5B a bit more). JH-E token is a variant of F32D iwhtout the curved line (i.e., a censer, not a wing). Current image here is wrong, no matter what.		rotated in Esna VII		
F2069	R		Y (>=D,JSeh/HG)		N						In JH-D, the sign is commonly used instead of a finger/claw, not a wing. (i.e, confusion with D50A). Due to the common tendency to misuse the sign, it would be better to leave it out of Unicode.		not a finger

		Y/WEAPON?							
		N							
	but with same tail posture as in I003; cf. I3B-I3L variants, all equally rarely attested; cf. I5B	?/WEAPON	DIFF	For the purpose of Unicode, it might be worthwhile to limit the number down to 1 croc with weapons.					
	TSL not clear	Y?		Additionally attested in Edfu VIII,164,12, Edfu XIV, pl. DCLXXVII, (lower bandeau), but the animal is basically lost, however, there are traces of the harpoon on the head					
	TSL not clear	Y?		The token is clear enough. For me, but has one problem, that the U44A above it might be intentionally touching the I3G as well, to create variant with a knife in the head and a knife in the back					
	JSesh has harpoon more vertical			. For the purpose of Unicode, it might be worthwhile to limit the number down to 1 croc with weapons. Harpoon is nearly vertical in this example.					
				I have no idea where this is attested					
		Y							
	TSL: weapon leans the other direction	Y/WEAPON		Harpoon can lean in both directions, based on whatever is above it. I don't consider the exact direction or angle of the harpoon significant for Unicode or TSL.					
n				I think the TLA source is rather I3B, see Edfu VIII, 77,14, photo 0092

Y				In TLA source, Edfu VII, 59,4, photo (wall) 259, three is no vessel between the snakes, so this could be represented by I40C mirrored.			Y											
Y	DIFF			Now lost in P. Turin (Bot0), chapter 130, col 3, but tepsuis did transcribed a single fok. In my opinion tnere is nothing on the head of the cobra in all three Kamak examples.			Y											
									Y	Dendera XI, p. 165.2, pl. 116		Y								
									Y	TSL (Edfu IV, p. 11.8), row, with overlapping bodies.		Y					Classifier for overlapping bodies.	Verified by Peter Dils.		
																			retrer. to unnrer. Schrift, p. 26, which does not give a location for this sign (it would not be better to read I22JC (ɪa)A) for that sign.	
																			Other misused for I22D8 (Current token has a vessel).	Brugsch, Thesaurus I, p. 108, but I am not certain where in certain this text is simply a handwritten form of what probably should be read as I22CC (ɪ41).
																			A cobra (Hajā hajaj), standing up, with expanded hood (Uraeus) (I6d, on top of a standard used for the carrying of religious symbols with the vertical sticks at the far side (I92A). A vase (mejn mejn), standing up, with expanded hood (Uraeus) (I6d, in front of a half round loaf of bread (X1) above an I6B (N8), on top of a standard used for the carrying of religious symbols with the vertical sticks at the far side (I92A). A vase (mejn mejn), standing up, with expanded hood (Uraeus) (I6d, on top of a standard used for the carrying of religious symbols with a loop under the horizontal beam, running over the vertical pole (I92A). 		Y (>=D,JSeh/HG)		N						Cauville (2001) token is F227A (I79A). The only valeurs/Kurth token I could verify with an image (Mammisis Dendera, p. 254,13, pl. LI, A) is F227A (I79A), which puts the other token (Mammisis Dendera p. 228,9) in doubt as well. Dendera XV, p. 339,1 (Verified by Peter Dils has cow-horns, and a different (longer) wig.				
y/i	Dendera Porte d'Hathor p. 24,6, p. 93	Y (in core)		Y				A cobra with the head of a female, with a coiled tail, wearing a headdress consisting of two plumes (59).	Logogram rnn.wtt (Renenouet).	(Redraw sign with the tail coiled like F2279 (I78A).) In the current token the tail is lost, but the available space makes the current form highly unlikely. JH-D token (Dendera, Porte d'Isis, p. 8,8, pl. 22, bandeau) has a coiled tail as F227A (I79A), if it isn't that sign to begin with. Cauville translates mHn.t rnn.wtt as l'uraeus-serpent bénéfique.		redrawn in place		
		N (auto)		N						Redraw in a new row, with head of a falcon, instead of a normal cobra with expanded hood. Kurth token (Edfu IV, p. 11,6) could not be verified with an image. (additionally, the suggested function (i)xr (BIFAO 55 (de Wit) p. 118).			Redraw in new row.	
y/i	Edfu IV, p. 11,6.	Y (in core)		Y				head of a falcon, with a feather (H6) on its head, vertically, with a coiled tail, consisting of four coils.	Phonemogram (i)xr.					
		N (auto)		N						(Dendera X, p. 208,3, pl. 129, col. 57) cannot be recoginised in the image (too poor to see).				
		N (auto)		N						JH-D token (Dendera XIV, p. 202,3, commentaire pl. XCV) is not clear enough in my image, but does seem likely based on what I can see. Function: Logogram xwi (to protect).				
y/f	Drioton, ASAE 40, p. 346, nr. 45.	Y (in core)		Y				Two bows, strung together as a package, with the four tips of the bow represented as	Phonemogram n.	Basically an elaborate form of F36D2 (R24).				
y/i	Dendera, Porte d'Horus, p. 18,2, p. 101.	Y (in core)		Y				A cobra (Naja naja), standing up, with expanded hood (Uraeus) (I64), with a forward, downwards dotted line coming from the mouth (I43), on top of the corner of a wall (O38); facing its mirror.	Logogram qr.ty (the two caverns).	I would personally maken only one sign used in arrangement, but there is clearly not a N44 below the spitting cobra.		Horus 18,3		Yes
y/i	TSL	Y (in core)		Y				A cobra in repose (Naja haja), standing up.	Classifier snake.					
		Y (>=D,JSeh/HG)		N						s refer back to the same tokens, which cannot be verified with an image (Dendera III, p. 165,11; IV, 232,1). I have no access to Athribis L 1, 25 \L 1,				
		N (auto)		N						No sources given.				
y/i	TSL	Y (in core)		Y				A cobra in repose (Naja haja), with its tail coiled up, in a single coil.	Classifier snake.					
y/i	Dendera Porte d'Horus, p. 48,5, p. 135.	Y (in core)		Y				A horned desert viper (Cerastes cerastes), with its tail coiled up in a single coil.	Phonemogram f.			Cobra with horns?		
		N (auto)		N						No sources given.				
		N (manual)	N	N						Practically a duplicate of F2293 (I80A).				
		N (manual)	N	N						Mirrored form of F2293 (I80A).				
		N (manual)	N	N						Practically a duplicate of F2293 (I80A).				
		N (auto)		N						No sources given.				
		N (auto)		N						No sources given.				
y/i	TSL	Y (in core)		Y				A snake, with its head facing its tail, with a knife with a triangular blade and straight handle (T30A) at its neck, and two over its body in the horizontal section.	Classifier snake, serpent (nHA-Hr).	Likely a hapax however.				
		Y (>=D,JSeh/HG)		N						Most likely a hapax, and proof is doubtful.				
		N (auto)		N						Sbbš, line 24) is no longer clearly visible, but I agree it with the Karnak project it looks more like a variant of I70B (I70F given as code in Karnak). Nonetheless, the signs without a doubt does not have a wavy line, circle or not.				
		N (auto)		N						Not a meaningful variant of F22B2 (I14).				
y/i	Dendera, Porte d'Horus, p. 25,15, p. 111.	Y (in core)		Y				A horned viper (Cerastes cerastes) with a coiled tail, consisting of two coils that are lower than the head.	Phonemogram f.	I am not certain if it is worthwhile to distinguish between this sign and F22B4 (I89A).		Horus 25,15		Yes
y/i	TSL	Y (v5.2)		Y				A cobra (Naja haja), standing up, with expanded hood (Uraeus), with a coiled tail, consisting of two	Classifier snake/uraeus (iar.t).

1	Y	DIFF	nmt.t1.r transcription is taken from Teti (PT 510b, spell column 306 and 307, see attached image) as a variant of D58, as a tradition. (the sign is not water at the front than at the back).	fish is often simplified.		Y			Edfu VIII, 80.12, Bartis photo 0094.	Y (in core)		Y				logogram/phone mogram bsi (to flood out, to emegar).

3				Belege 1 (Zivie-Coche 2004, Tanis), p. 102, col. 10 has a fish which is a bit bend downwards, but not remotely like K18B.					Dendera Porte d'Hathor, p. 2,5, p. 70.	Y (in core)		Y			A fish, with its tail oriented downwards. with two small fins on either side of its body (K8@) on top of legs in a walking posture, feet orientated towards the reading direction (D54).	logogram/phone mogram bsi (to flood out, to emegar).	survey of the JH-D tokens are either F2227 (K18A). Additionally, I doubt this would be a meaningful variant of F2325 (K18@) to begin with. Nonetheless, it does exist, thanks to verification done by Peter Dils. (However, I would still argue against its inclusion).	Yes

14	N	?	DIFF	I have no idea. I am not certain that this fish is distinct enough, although that might be the idea, to function as a catch all fish (based on the large number of functions in Caville and Kurth). I can accept this addition, as I feel that the distinction between fishes bots out in the late period anyway.

Y?			Test example is M72 (pt 408b, same as the TSL token M72 from Unas).					N		Y/												
Y			(Comment JG Why should an argument could be made for having a distinction between the two flower types, which I prefer (even though the signs are indeed similar).																			
Y	DIFF		I think this is a misinterpretation, as Chassinat simply uses the M12B (no image available for Edfu VII, 4.3).					N		Y/

The TLA source (Turin Cat. 154, line 3) is simply a M12B in my opinion. y Diff more stems from L1 or P1 (first column from left) y/i TSL Y (in core) A stem or papyrus with a bud, with two shoots at the bottom. F274D	M-22-030											y/i	Berlin museum (awaiting exact location, on a granite object).	Y (in core)		Y				A bundle of flax stems, bound together by string, loop and tie at the back, with a widening base and top, with the bolls visible on the top.	Classifier tying, binding (dmA).	Verified by Daniel Werning.				Yes
F2760	M-23-001											y/i	TSL	Y (v5.2)		Y				A basket with four pieces of grain or fruit.	Classifier granular product (snTr).					
F2761	M-23-002													N (auto)		N						No sources given.				
F2762	M-23-003					TLA token is a bit different, ACEr 18, pl. 16, 56, offering list, line 3, dAb. > it is a double layer of dots, not floating dots (TSL candidate class M397)						y/i	Dendera VIII, p. 109,6, pl. DCCLVII	Y (in core)		Y				A basket with two roes of four pieces of grain or fruit.	Logogram THn.t ((a vessel) with faiance).	Redrawn in place. (Sign is more two rows of dots, rather than floating dots (i.e., form of F2760 with two rows), redraw to that form? Transcribed as W113 in the publication.) (Dendera IV, p. 247,6; Dendera VII, p. 182,10) could be verified with an image.		redrawn in place

F2780	M-24-001											y/i	TSL	Y (v5.2)		Y/R				A vertical bundle of reeds, tied together, with the ties at the front	Phonemogram is.	make the loop larger.				
F2781	M-24-002													N (auto)		N						No sources given.				
F2782	M-24-003													N (auto)		N						No sources given.				
F2783	M-24-004					no TSL (class) yet, as I doubt the simplified form of M40 is really worthwhile. Gardiner (1928) calls it a less common Dyn 18 form of M40. Locating one of these at random seems unlikely.						y/i	TSL (TSL_3_23255)	Y (v5.2)		Y				A vertical bundle of reeds, tied together, with the ties resembling a triangle.	Phonemogram is.	Exists to some extend, but I highly doubt it is a meaningful variant of F2780 (M40) for Unicode, beside some similarities with [illegible] supposedly a mirror for F2780 (M40), if it isn't a form of Y1.		inverted	Yes	
F2784	M-24-005													N (manual)	N	N										
F2785	M-24-006		check orientation/mirroring	Y								y/i	Edfu VIII, p. 163,1, Edfu XIV, pl. DCLXXVII.	Y (in core)		Y				A vertical bundle of reeds, with a sloped top towards the front; tied together, with the ties at the back.	Phonemogram is.	Not a mirrored form of F2786 (M40C)				
F2786	M-24-007		check orientation/mirroring	Y								y/i	BM EA 147, line 5; 15.	Y (in core)		Y				A vertical bundle of reeds, with a sloped top towards the back; tied together, with the ties at the back.	Phonemogram is.	Not a mirrored form of F278S (M40A)				
F2787	M-24-008													N (auto)		N						The only token in Cauville that might have been this sign (Dendera V, p. 11,17, pl. CCCXXXIV) is lost. According to the transcription it was F2788.				
F2788	M-24-009													N (auto)		N						No sources given.				
F2789	M-24-010													N (auto)		N						Valeurs token (Daumas, Mammisis Dendera, p. 247,7) could not be verified with an image (and had a sic in the transcription).				
F278A	M-24-011											y/i	Dendera VIII, 68,1	Y (in core)		Y				A bundle of reeds, with a sloped top towards the back; tied together, with the ties at the back, with the tops of the reeds visible.	Phonemogram is.	Verified by Peter Dils.				
F2788	M-24-012													Y (>=D,JSeh/HG)		N	F278A					JH-D tokens (Dendera XIII, p. 78,9; p. 113,3, commentaire pl. XXX; Dendera XIV, p. 75,11, commentaire pl. XXXIII; p. 125,9, pl. LIII) are either M185 (I think, images are not great, but all have the slope at the back), or have no image. Valeurs token is F278A (M185).				
F27A0	M-25-001											y/i	TSL	Y (v5.2)		Y				A log of wood.	wood/timber (aS).

F27A2	M-25-003													N (manual)	N	N						Rotated form of F27A0 (M41).				
F27A3	M-25-004					F1 examples (F1r,F1v in 13-14) are a different sign, looking like S105/Aa9. (based on TLA, occurs more often with ag,t, but I am not yet sure what it is supposed to be.									N (auto)		N						Current PT tokens do not support this sign.				
F27B0	M-26-001	Y										y/i	TSL	Y (in core)		Y				A vine on two forked supports.	Logogram kAn.y (gardiner, vinter).	It appears sign should be redrawn as F27B5, but on a base (i.e, on the far side the vine descends to the base).				
F27B1	M-26-002	Y				other TLA sources are different variants of M43A (only ACEr 16 seems to have the base									N (manual)	N	N									redrawn in place	Redraw in new row.	
F278A	M-26-003												ACEr 16, pl. 12,b; 34,b, offering list, 6,12.	Y (in core)		Y				A vine with fruits on two forked supports, on top of a base, with the back of the vine descending to the [illegible]	Classifier wine (irp).					
F27B9	M-26-004											Y?/f		N (auto)												
F27B2	M-26-005					Extremely variable.						y/i	TSL	Y (v5.2)		Y				A vine with fruits on two forked supports, with the back of the vine descending down, into a basket or vessel	Logogram irp (wine).

mrrtored version of O005

Used in Kkmak as construct sign.

construct sign to write something inside the rectangle; I am not convinced of the TLA tokens either. Zivie-Coche (2004), bele¥ 1-2 is a construct sign, with R8 in it. Bele¥ 3, M#A'O 126, pl. 562-567, cot 1, the image is poor, but I don't think the rectangle is empty.

either. Zivie-Coche (2004), bele¥ 1-2 is a construct sign, with R8 in it. Bele¥ 3, M#A'O 126, pl. 562-567, cot 1, the image is poor, but I don't think the rectangle is empty. Bele¥ 4 (Edfu VIII, 147,12 cannot be verified with an image. Bele¥ 5, 64,5 is undoer, but if it is this sign, it was written on its side with a A21 variant within it. Bele¥ 6 is a construct sign exist, and all the constituent forms can be represented with the system created by Andrew.

Not completely sure, as it would be used for ?wt-r:t?, but maybe in louvre C 287, line 3 and col. 2. I am not sure if this might be some other shrine instead.

No longer needed with the system of Andrew, I assume this is intended to be a construct sign for insertion.

louvre C287, line 3, col. 2.

Dendera X, p. 218;9, pl. 132, col. 11.

Edfu VII, 73,2, Barteis photo (wall) 273, 153;16, Barteis photo (wall) 440 (xsand).

N	basis for O103, O104, O315	Y	U+33 is not attested in this list, nor in Gauville or Kuhn. Based on the examples from this list, I doubt if O103 or O104 exist either (see below). At these do not seem to occur, I see no reason to include this form either, as the base would not be required.	DIFF	Basis for insertion	match example is rather an overinterpretation based on Jequier (pl. XXVIII, col 730, see attached image), which I would rather call O2608.1. In other PT example comes from, but as it is in a damaged section, I wonder if it is not O2608 as well.	N

TSL tokens are all technically variants.	Insertion. XII 5&7, line 1 has a variant within. Edfu VII, p. 17,3 (verified with image from Philipp Seyr) is basically a variant of the one in the middle. Heads to become atonic if we do not add F2045 (O320), vaiwr tokrn is r1ung (O122A), not this sign (with these distinct corners).

but basis as new sign?	N	Oxford O.C. 1109, line 14 (Simpson Terrace, pl. 84) I am not certain if Cairo CG 20089, line 12 is exactly this sign. BA EA 243, line 14 seems this sign. I doubt the inclusion of the base (O13 combined with O11) is valuable, nor do I see any real value in the three side battlement as constructi sign for Unicode.

Not that technically the token in T5L is closer to P13 upside down. (although this token is one of the PT examples here).

Y

in both cases, the sign is less clear than I would like (for example, see P/F/E 17, PT 865Q.

cf. P20, F17, T5L has example which is rather P2O N

same sign. IA1t. signtxy smaller). In T5L I added both P1C and P2O as codes for this sign (was only P1C. P20C was never added during the Hathman already spotted this isue and removed it from the list).

I don't think xIU 1002. line 7 is this sign, but rather simply P1.

Not this sign (Meith, PT 55C. Jaquier pl. IX, col 1&6. the sign should be (based on the function, class sdn) probably be an eye.

P1 716b (NL sethe column 1322. needs verification by squeeze. however, I don't think it should be read as this sign. See sethe form, classifier xns (to traverse, to travel through)

F3313	P-09-004										
F3314	P-09-005					I highly doubt it is this sign in P/D-ant,/W 64. Based on the remnants of the DS8 in front of it, I wonder if it is not a variant of U13 (although it would be in the oposite direction)

F3327	P-10-008										
F3328	P-10-009										
F3329	P-10-010	what is this?	?	DIFF		Unclear, classifier for mADw (which Allen assumes to be ferries,Hannig as bridge supports). I consider this grapheme rather an overrepresentation of the actual signs (PT 445d, Piankoff pl. 36, col. 3 from right), alhtough I agree that they are distinct from N11. If included (seems to be a hapax), the grapheme needs to be adjusted.

N	is this really an arm? or rather qaf like in R010; cf. TSL with some attestations	Y	DIFF	variety in this sign, I suggest only including R10 in Unicode. The first attestation has a rounded part at the feather block, so I took it as the arm, however, I agree that the other two might simply be a straight base, but I doubt we will ever be certain if it should be taken as hand or not.					Not convinced by any of the TSL tokens with an arm.
				Note that due to the variety of this sign, this token was remarkably difficult to find! (hence the cursive token).

	overlay (although not both centered)?			Overlay. Sehel Stela (MIFAO 126, 566-567, col 23) is really vague, but I would read R77 over R78 here.					
	cf. Gardiner/J Sesh R15	N?		All 3 KIU cases have an arm written over the sign (like R77/R78). The tokens do not seem to have the distintive ties below the horizonal line. Similar sign in Jsesh, although it seems the Unicode form tried to make a variant between T63A and T63B. However, based on T63B, it seems the 'bones' are an error, so probably covered by T63B. Gardiner (1953) did not provide an origin.					
				Be covered by Gardiner/Jsesh R15 (which should be the Unicode Grapheme as well). (none of the exmples have ties below the horizontal beam which are at 45°.

F3655	R-12-038	1											Y/i	Esna VII 612,06, p. 171,6	Y/R (in core)		**Y/R**				A spear made into a standard, with a circle on either side of the speartip, with a backwards curving loop over the standard.	Phonemogram iAb.	612,06, p. 171,6, verified by Peter Dils) does technically exist, but has a rather poor loop drawing in the current token (should be more like the F3619 (R104) standard type of loop. I highly doubt this is a meaningful variant for Unicode. If added, it needs to be redrawn.				
F3651	R-12-039	4											Y/i	Dendera X, p. 92,2, pl. 68 (col. 202)	N (manual)	**N**	**N**				An eye (UAt), written over a spear made into a standard, resembling a fire-drill in a piece of wood (HG R15A).	Logogram iAb.t (left eye).	Overlay.		eye		
F3654	R-12-040	2											Y/i	Esna VII 567,04, p. 53,8	Y (in core)		**Y**				A spear made into a standard, resembling a fire-drill in a piece of wood (U28), with a floating dot at eithere side of the cone, with two ties or bands of cloth at the far side of the pole.	Radicogram iAb.t (left eye).	verified by Peter Dils. **Redrawn in place.** (Redraw the sign as F364C, with two dots floating a hight near the tip of the central cone, above the tips of the N26 base, not much closer in.) However, I am not certain this represents a meaningful variant [illegible]		redrawn in place	Yes	
R13. Emblem type R80																											
F3660	R-13-001	3													Y (>=D,JSeh/HG)		**N**						where this sign occurs.			
F3661	R-13-002	3													N (auto)		**N**						No sources given.			
R14. Emblem of eighth nome of Upper Egypt																											
F3670	R-14-001	3		check shape of attestations	?	DIFF	Beleg 2 (Los Angeles 50.33.31, JEA 38, pl. 1) is a bit different, see line 9, basically R17 with the feathers of R17A. I could not verify Beleg 1 (book not availabe), but I doubt it is this specific grapheme.								Y (>=D,JSeh/HG)		**N**						Currently not supported. FSOT seems to be true for the TLA token as well. (Athribis token is shaded at the top, so cannot be used to verify this sign).			
F3671	R-14-002	5													Y (>=D,JSeh/HG)		**N**										
F3672	R-14-003	2					Could not be verified with an image, but based on the tokens of TSL_1_5297_01, I wonder if the horns are not always actually a bar.						Y/i	TSL	Y (in core)		**Y**				A wig, without fillet, with two feathers and a horizontal bar, upon a pole	Logogram tA-wr (8th nome of Upper Egypt).					
F3673	R-14-004	2													N (auto)		**N**						No sources given.			
F3674	R-14-005	2													N (auto)		**N**						Valeurs reters to WB V, p. 371, which shows htat this sign is technically a misinterpretation (it is basically F3673 without a stick), but I cannot verify the source as given in the slips, as I do not know which object (Kairo Wb. Nr. 144, supposedly in Sethe 25, 107) it is.			
F3675	R-14-006	2		more often without disk between feather and without horns? (like R17C); cf. TSL			Probably, as it would be difficult to see in sunk relief. None of the PT examples seem to use the disc. KIU 1128, line 6 has a variant which includes a standard as well (which seems to be the habitual form in Karnak).						Y/i	Louvre C 26 (top register, column in front of the right looking seated figure).	Y (in core)		**Y**				A wig, without fillet, with a headdress consisting of two feathers on top of the horns of a ram (S77), on top of a standard used for carrying religious symbols (R12).	Logogram tA-wr (8th nome of Upper Egypt).	**Redrawn in place.** (Redraw sign as F3571 (R17D), replacing the stick with the standard. (i.e., no sun disk).)		redrawn in place		
F3676	R-14-007	7											Y/i	TSL	Y (v5.2)		**Y**				A wig, with a fillet, with a headdress consisting of two feathers on top of the horns of a ram (S77), on top of a vertical pole, on top of a parcel of land with irrigation ditches (N24).	Logogram tA-wr (8th nome of Upper Egypt).	**Redrawn in place.** (Redraw to a from without the sun between the feathers.)		redrawn in place		
F3677	R-14-008	3													N (auto)		**N**						Valeurs token (KIU 4205, line 1 (Opet I, 186), should be read as R17. I currently have no access to Athribis I, 1, 111.			
F3678	R-14-009	9		design without disk between feather; check shape of attestations	Y	DIFF	Neither TSL token supports the disc.						Y/i	TSL	Y (in core)		**Y**				A wig without a fillet, with a headdress consisting of two plumes (59), with a cobra (Naja haja), standing up, with expanded hood (Uraeus) written behind the wig, upon a pole	Logogram AbDw (Abydos).	**Redrawn in place.** (Redraw to a form without the circle between the feathers.) One could argue the snake represents F37E3 (S82), the uraeus tipped fillet.		redrawn in place		
F3679	R-14-010	2													N (manual)	**N**	**N**						Uveriay. No sources given.			
F367A	R-14-011	3		cf. R18A/B/D; check shape of attestations	N		All TLA belegen are R18A. (See BM EA 10208, 1,1; 3,3; 3,4)								Y (>=D,JSeh/HG)		**N**						Valeurs toxens were R18A (the additional uraeus seems a creation by Gauthier, neither of his sources are more than R18A).			
F367B	R-14-012	8		design without disk between feather; check shape of attestations	Y	DIFF	TSL token does not support disc. (although it varies slightly in other details as well).						Y/i	TSL	Y (in core)		**Y**				A wig without a fillet, with a headdress consisting of two plumes (59), with a cobra (Naja haja), standing up, with expanded hood (Uraeus) written behind the wig, upon a pole (R18A), on top of a sand covered mountain over the edge of the cultivated areas (N25)	Logogram AbDw (Abydos).	**Redrawn in place.** (Redraw to a form without the circle between the feathers.)		redrawn in place		
F367C	R-14-013														N (auto)		**N**						No sources given.			
F367D	R-14-014	3		design without disk between feather; check shape of attestations	Y	DIFF	Both TLA tokens (Edfu VIII, 120,1; 120,7, photo 0152) are R18B, which is transcribed in Chassinat as well. Note that neither form supports the disc either.						Y/i	Dendera X, p. 282,15, pl. 166 (col. 12.	Y (in core)		**Y**				A wig without a fillet, with a headdress consisting of two plumes (59), with a cobra (Naja haja), standing up, with expanded hood (Uraeus) written behind the wig, upon a pole (R18A), on top of the hill country over the edge of the cultivated areas (N25)	Logogram AbDw (Abydos).	**Redrawn in place.** (Redraw to a form without the circle between the feathers.)		redrawn in place

Kzmak token is actually part of none sign (cf. NU003, NU008; cf. also S79A)

both cases are damaged, and are indeed part of a nome sign.

Not clear. Edfu VII, 50,11-12 photo (wall) 313). It could be S5 on a standard as well.

Barteis photo (wall) 313 (krand).

Edfu VII, p. 50,11-12, Barteis photo (krand). 313

Note however that the tie is at the back at with this token, not at the front. Should probably be added somewhere near R18 in the list, not here.

Edfu VII, p. 27,5,9.

Dendera X, p. 100,3, pl. 70 (col. 133)

Dendera X, p. 244,4, pl. 141 (top image, third column of the second group of columns).

Dendera X, p. 74,2, pl. 65, col. 64

Blackman, Dendur p. 45, pl. 70,2.

Dendera X, p. 244,4, pl. 141 (top image). This sign is nearly certain based on the iconographic representation which the king carries.

The sign itself (Edfu VIII, 79,3, photo 0093) cannot be clearly seen on the image, but reading this sign is nearly certain based on the iconographic representation which the king carries.

	cf. S15	Y?	DIFF	All PT tokens are the Jsesh form of S17A or S197.					
		N	DIFF	KIU 4205 example is this sign, but below the N1 the lines do widen a bit.					
		Y							
R		Y	DIFF	All attestations I could verify were more like S178, i.e 3 hanging parts, not 4. One of the Karnak examples is encoded in TSL under S15A.					With three lines only.
	snape or attestations; Karnak token partly deestroyed	Y?		Based in TSL, this form (3 hanging things) is actually more common that S17A.

rsoor tnat nearry an toxens are technically 3&8. (nake into cdxs1), and try to tocate (probably in cursive) a form of this grapbmere.

md:n

Technically the most common form of this sign, i.e., without the horizontal stroke. For Unicode I prefer to continue to use 543, as it is what people are used to.

TLA token is S43B.

rsoor tnat nearry an toxens are technically 3&8. (nake into cdxs1), and try to tocate (probably in cursive) a form of this grapbmere.

Should be category S indeed. however, it has nothing to do with Hathor mode to category 2 to my knowledge.

Overlay. TLA token is a reconstruction.

rsoor tnat one onry hieroglyac attestation in TLA. Cairo CG 34215 (laoui 3rd col from right) should be read as R16 (I think, it clearly has two pinnes).

I.A. uxem is ury anmeter in transcription, could just as well be F299C (S156).

rsoor tnat one only verified with squeeze (Note the half moon, should be that this variant should not be confused with R13, as the feather is in a different position).

F. Sillier 2 (BM EA 10182), col. 2,5.

xiu 393&. middle of the line (nnage 155278)

xiu 394&. near the start of the line.

Unas. PT 88b. Faulkoff pl. 65, 3rd col from right.

Unas. PT 131d. Faulkoff pl. 57.

xiu 113&. line 17.

Overlay. TLA token is a reconstruction.

F. DeM 2, verso 5/6 (DFAO 8, pl. 17/17d).

Dendera X, p. 120,8, pl. 74, top nnage, col 8.

Should be category S indeed. however, it has nothing to do with Hathor mode to category 2 to my knowledge.

rsoor tnat nearry an toxens are technically 3&8. (nake into cdxs1), and try to tocate (probably in cursive) a form of this grapbmere.

R	variant of AA021	Y		In the Hieroglyphic tokens, it is this sign, but the cross-bar is a lot smaller, similar F39E3, but clearly a cross-bar. See for example Edfu VII, 91,10, Edfu XIV, pl. DCXLIII (col in front of Horus).					
	Karnak-made glyph with more like sky sign in lower part	Y		Grapheme should not be adjusted.					
				TLA token (Edfu VI, 22,14, photo (wall 443) is F39E3.					
	two details different in AA020	Y?							Not a meaningfull semographic variant
N				Overlay. KIU tokens are actually a variant with Aa20B as a base, not Aa20 (KIU 3552, line 1).					
				I would not call this sign a correct representation of Brovarski, Giza mastabas 7, fig. 52, pl. 32 (botreg, middle section left, see the iconography, not the text, as this is clearer, but the sign is the same (based on fig. 52). Based on the function, maybe an OK variant of O51?					
				TLA token (P. Turin, BotD, chapter 124, col. 10) is Aa20B, not Aa20C.

		N (auto)		N						**Moved**. No sources given, variant of F4067 (S23) in valeurs.				
		N (auto)		N						valeurs token (Dendera V, p. 156,4, pl. CCCCLVI) would be better served by F39E2 in my opinion, but it could be either.				
Y/i	P. Turin 1791 (BotD), chapter 147, col. 19; Dendera, porte d'Hathor, p. 38,6, p. 105 (drand).	Y (in core)		Y				An object consisting of a horizontal rectangle with a triangular indentation at the bottom, with a vertical line on top of it, with a horizontal line on top of the vertical line, to the same width of the rectangle.	Logogram wDa (to judge, to separate).					
		N (auto)		N		F39E3				Valeurs token (Dendera II, p. 77,2) could not be verified with an image. Verified by Peter Dils, is Aa21D or Aa42.

Y/i	Edfu VII, 91,10, Edfu XIV, pl. DCXLIII (col in front of Horus).	Y (in core)		Y				An object consisting of a horizontal rectangle with a triangular indentation at the bottom, with a vertical line on top of it, with a short horizontal line crossing the vertical line. Facsimile only, but without knowing the state of the original, I cannot say if this is intentional, or simply a variant due to weathering. **Moved**. (Move sign to category S27. TEA token is not this sign, see P. Turin, 8015, weighing scene after chapter 125, in front of Thot. Sign probably should have been left in category 5.

Token is simply the OK form of T13 (classif. rs).

PT token should be read as F36 (pnome-rep. ìAt;, for tAt.t @ town).

I am not sure what is written in BM EA 10371,3, 411 (MZ) but I would not call it this sign.

r+ 3o2 (v) panmom pr. >Y is an unusual form for what should be F36 (band is very low), but it is clearly not this sign.

I am not completely sure, but I would call Cairo CG 34013, line 18 something else (classif. 5ñ4 w. incense/makeup spoon, see Hannig 884). however it is clearly not this sign.

uncertain. might be simply a variant of V1, or it is intended to specifically refer to the curl of the red crown, see MHAT7, P. 373C (U). Papkoff pl. 25, 3rd col from left.

r+ 42vo (r), secne column scene after chapter 125, in front of Thot. sign probably should have been left in category 5.

Not this sign, but something similar. See PT 1428a, MZ anr/W 47, MAFAO 14o, fig. 30. Not sure what it is, r. it is used for ḥwꜣ (in the divine name ḥwꜣ-wr). I don't consider A41 a good reflection of this sign.

I am not sure what is written in BM EA 10371,3, 411 (MZ) but I would not call it this sign.

									overlay but I am a bit concerned about the difficulty of getting a good rendering. Hence monogram approach might be better.
Y	likely monogram, no functional overlay	Y		for xt-ds (some type of tree), so technically a overlay (as it is simply two existing functions of both signs).					
N		Y	DIFF	Beleg 1-2, 4 are T102 (upwards lines at the base). In Beleg 3 the image is too poor to see (Edfu VIII, 169, 16, photo T012). The closest example of this grapheme I found in P. Turin (BotD, chapter 15, col 31, but even there I could argue there are the upwards ticks with the base. I am not sure if this grapheme really exists intentionally, or if it is simply a poor form of T102.					
		Y		One of the TSL tokens for T29 is actually T102.					
Y			DIFF	TSL candidate, Edfu VIII, 34,10, photo 0049. (title and recitation, column 3). Note that the grapheme should be adjusted, the lower part should be formed based on F41/F41A/F43, not the current shape				
N	Could not verify the shape	Y	DIFF	(see P1 2246 (D), Hankoff pl. 54) an variant of T30 at best, not T31A. TLA token (DAS 64, 113 (pl. IV, bottom line) looks like a normal T31 to me.

PT 1156e P/c ind•/W 50 looks similar, but is actually some type of staff (see MIFAO 118, fig. 24 (pAs.t verify t.ehu Vii, 7,1 with an staff to be precise). I cannot image, but i doubt it is this sign.

I am not certain how much value there is to distinguish between U23B and U23.

Agreed, the variation mInor at best; the TSL tokens could just as well have been represented by U23.

r nwre no ioee wnrre ereg 1-2 is attested (seems to be pa.6-a.t, back pillar); ereg a statue of nxt-sp4w son of 3 is a different sign variant in my opinion. wore tnat none or tne r.s. Tokens is perfectly This graphneme. (sign is highly variable).

F4190	R	what is this; category correct?	Y		None of the TLA tokens have the internal lines, and some of the tokens are R33. Sign used is some form of O32A, but probably interpreted as a table (classifier for festivals)					Should represent a woven basket, as appears in spelling of the wig-feast, inter alia.
F41A0										
F41A1		insignificant variant (1% of V032)	N		Agreed that the variation is not worthwhile. Karnak token is actually a variant of V32C (KIU 3553, line 5). TLA token is better served by V32E (Edfu VII, 25,13, photo (wall) 2110).

				I cannot verify Edfu 87,9 with an image. Note as well one needs a near perfect example to distinguish between X3B and X3C.					
				Some of the TSL tokens could be argued to be X3A.					
				All Karnak tokens could be read as X4 or its bare oval form as well. PT tokens are a flipped TSL_1_6695_03 at best, but could be considered a X6 as well.					
	cf. X004 (X4f)	Y?	DIFF	Prefer that this grapheme would be used for U+133D2 instead of the X4F form. Both would be unnessesary.					
Y				Grapheme is used for Jsesh X4A and X4E as well. I would argue to only include U+13303 in Unicode, not the Hieroglyphica form as well, as they are unnesesary similar. (basically the distinction is based on if the bottom and top half circles touch the side half circles.					
Y		Y		Some of the X4 tokens is actually this grapheme. (TSL_3_22910). However, I could argue that this grapheme should be more oval like X4.					
N		Y	DIFF	Adjusted to the Jsesh/Hieroglyphica X4 form instead, as I highly doubt one can differentiate between X4 and X4F without perfect images. Karnak token is no longer visible (so could be any other X4 form as well). Due to the potential of confusion with N16/N18, I would prefer if this did not exist in Unicode. However, this is actually the most common form of the X4 variants					
				I am not sure if this inclusion is worthwhile for Unicode, but does exists					
	monogram	Y							
	cf. X006; check shape	?	DIFF	Karnak token could just as well be X6 (although functionally it is actually a variant of N9/N10). All the TLA tokens are either 'varr' or in the Annals inscription of Amenemhat 2, which does not support enough detail to distinguish between X6 and X6D.					
				I am not sure if this should ever have existed. Gardiner (1928) calls this a more detailled form of X6, but does not provide a location. I don't think this inclusion is worthwhile at all.

F4579					suspicious shape; missued in TLA for what?	?	DIFF			Probably misused for either Z5 or Z5A.
F4556										
F4557										Could be done by rotation of U+133EE, graphically a duplication, but has additional functions that Z016A is not supposed to have (i.e. y).
F4558					identical to Z016A	N

F453A			N (auto)		N						Valeurs (rather Valeurs Y79).	
F453B			N (auto)		N						Quendera IV, p. 259,14) could not be verified with an image. Valeurs token should have been represented with R129.	
F453C	y/i	Dendera II, p. 77,4.	Y (in core)		Y				A sistrum, with two curls on top of human head with ears on top of the handle, without central piece.	Logogram sSS.t (sistrum).	Verified by Peter Dils. JH-D token (Dendera XII, p. 94.1) could not be verified with an image. Cauville token (Dendera I, p. 62,13) could not be verified with an image. Neither could the Kurth tokens. Due to the likely misuse for R129, I consider it better to leave this sign out of Unicode.	
F453D			N (manual)	N	N		F453F				Duplicate of F453F (Y8).

F453F	y/i	KIU 785, line 8.	Y (v5.2)		Y				A sistrum, with the top piece in the form of a shrine encosed by two curls.	Classifier sistrum (sxm).	Could be sSS.t as well.	
F4540	y/i	Dendera XI, p. 4,2, pl. 9 (left image, 2nd col from left).	Y (in core)		Y				A sistrum, with the top piece in the form of a shrine encosed by two curls, with the human face on the handle having hair.	Logogram sSS.t (sistrum).	Minor variant of F453F (Y8 with hair basically), that I would prefer to leave it out. (Difference between the two signs is often very difficult to see).

between z11 and z11A rather arbitrary, however, some of the TSL tokens have both beams at the same length, so could become Z11A instead.
