

Title: Additional draft repertoire for 10646:2020 Amendment 2 and Unicode 16.0

Date: 2023-08-04

WG2 N5235R L2/23-146R

Source: Michel Suignard (Code Chart editor)

Status: Summary of character repertoire addition for ISO/IEC 10646 6th edition Amendment 2 (CDAM2.3)

Action: For review by UTC, WG2 experts

Distribution: UTC and ISO

Replaces: N5235

Status

In addition to being a summary of character repertoire addition for ISO/IEC 10646 6th edition Amendment 2 (CDAM2.3), this document also presents all characters that constitute new repertoire for the future versions of the Unicode Standard 15.1 and 16.0 with code positions, representative glyphs and character names.

Note therefore that this summary includes characters already added in Unicode 15.1 (5 Ideographic Description Characters and 622 Urgently Needed CJK Characters) and also includes the Egyptian Hieroglyphs extension (proposed in the range U+13460..U+143F9) and two arrows (proposed at U+1F8C0 and U+1F8C1) associated with that repertoire which are not yet included for Unicode 16.0 according to the Unicode pipeline as of August 4 2023.

Feedback is welcome regarding all aspects of these characters, including whether they are acceptable for eventual encoding and publication.

Manner of Presentation

In this document, the new characters are not shown in the context of the existing characters. The existing characters will be shown in the future version of this code chart. The occasional use of the word <reserved> in this draft is an artifact of the production process and should be ignored.

Note to Reviewers

Please use this document as a summary of UTC and WG2 review of pending proposals.
