Title: Revision of 622 UNCs of China (Feedback on WG2 N5214)

Source: China National Body

Author: TAO Yang

Status: Member Contribution

Action: For consideration

Date: 2023-06-30

1. Summary

As two drafts of a GB 18030-2022 amendment are issued by China, a large number of experts participated in the discussion of them. According to the opinions of experts, China has carefully considered the processing method of each character.

Considering the limitations of UCS compilation rules, UTC suggests to encode the draft 2 (within 614 glyphs) directly, and name it Extension I. China except this suggestion.

Due to the draft still being revised, the glyph list is still unstable, China and UTC agreed to make the final revision of the glyph list.

Finally, China has made adjustments to the glyph list based on expert opinions, retaining 622 characters in the list, removing 56 characters, and adding 64 characters back.

2. Characters Removed
