Doc Type:	Working Group Document
Title:	Proposal to encode the Tai Xaau script in UCS
Source:	China National Body
Status:	National Body Contribution
Action:	For consideration by ISO/IEC JTC1/SC2/WG2
Date:	2025-06-16

0 Executive summary

This proposal is a revised version of:

- China National Body: “Proposal to encode the Tai Xaau script in UCS” ([WG2 N5310](#))

and it incorporates comments made by the Ethnic Affairs Commission (EAC) of Honghe Prefecture, the EAC of Yunnan Province, China Electronics Standardization Institute (CESI), the Institute of Software, China Academy of Sciences (ISCAS), and other individual experts. Compared to the previous version, this proposal rewrite [Section 2.1, “Relations with Tai Viet,”](#) specifically:

- This proposal conducts a survey of font styles and explains the stylistic differences between Tai Xaau and Tai Viet.
- This proposal solicits feedback from the Tai Xaau community on each Tai Viet glyph in all the available Tai Viet fonts, provides a glyph comparison table, and explains the glyptic differences between Tai Xaau and Tai Viet.
- This proposal investigates similar cases of Brahmic scripts in UCS and explains the differences in ethnic identity among user communities of Tai Xaau and Tai Viet based on recently published papers.
- Based on the differences in font styles, glyph shapes and user identity, this proposal recommends disunifying Tai Xaau to Tai Viet.

As in the previous version, this proposal proposes adding 76 Tai Xaau characters to UCS.

1 Introduction

The Tai Xaau (傣仂, tai⁴³xa:u³³, tai xaau) script is an Abugida script written by the Dai people (傣族) of Yunnan Province (云南省), PRC, to record the Jinping dialect of the Dai language (傣语金平方言). The total population of the Dai people in China is over 1.32 million (2021 statistics), mainly distributed in Yunnan Province and a few in Sichuan Province (四川省).

The Dai people have a long history. Like the Zhuang (壮族), Buyei (布依族), Dong (侗族), etc., who are close in origin, the Dai people are also descendants of the ancient Baiyue (百越), of which the Dai people are part of the Dianyue (滇越). According to the records of the Dianyue in *Shiji* (史记) and *Hanshu* (汉书), during the Han Dynasty (汉朝), the ancestors of the Dai people lived mainly in present-day south-western Yunnan Province.

The Dai people can be divided into several branches according to their endonyms, such as Tai Lue (傣仂) for those living in Xishuangbanna (西双版纳), Tai Taue (傣德) and Tai Le (傣哪) for those living in Dehong (德宏), Gengma (耿马), Menglian (孟连) and so on, Tai Xaau (傣皓) for those living in Jinping (金平) county of Honghe (红河), and so on. These endonyms have the same first syllable and different second syllable, inferring that they originate from the same ethnic group. After the establishment of PRC, they are collectively known as the Dai people.

The Dai language (傣语) belongs to the Zhuang–Dai (or Tai) languages of the Zhuang–Dong (or Dong–Tai) languages of the Sino–Tibetan language family, with more than one million speakers in Yunnan Province and Sichuan Province, PRC. According to the difference in phonology and vocabulary, there are four dialects of the Dai language in China: Dehong dialect (德宏方言, ISO 639–3: [tdd](#)), Xishuangbanna dialect (西双版纳方言, ISO 639–3: [khb](#)), Honghe–Jinsha dialect (红金方言, ISO 639–3: [tiz](#)) and Jinping dialect (金平方言, ISO 639–3: [twh](#)).

The Tai Xaau script is written by the Tai Xaau people, mainly in Jinping Miao, Yao, and Dai Autonomous County (金平苗族瑶族傣族自治县), Honghe Hani and Yi Autonomous Prefecture (红河哈尼族彝族自治州), and a few in Jiangcheng Hani and Yi Autonomous County (江城哈尼族彝族自治县), Pu'er City (普洱市), both in Yunnan Province (云南省), PRC, to record the Jinping dialect of the Dai language, so it is also known as Jinping Dai writing system (金平傣文).

The Tai Xaau script is an Abugida script in which consonant letters behave as base units with inherited vowels, while vowel letters behave as additional units and cannot appear alone. Similar to Tai Tham and New Tai Lue, the Tai Xaau script contains two sets of consonant letters, constructed as oppositions of voiceless and voiced consonants in Proto-Tai, and expressed as higher and lower tone classes. However, unlike Tai Tham and New Tai Lue, the Tai Xaau script has no subjoined consonants, that is, all consonant letters behave identically.

2 Script details

2.1 Relations with Tai Viet

The Tai Xaau script is related to the Tai Viet script ([ISO 15924: Tavt](#)), which is encoded in ISO/IEC 10646:2003/Amd.5:2007 (and in Unicode Standard Version 5.2), as it can be noted that some letters are similar in their glyphs and sounds. According to [L2/06–041](#) ([Ngô & Brase, 2006](#)) and [L2/07–039R](#) ([Brase, 2007](#)), the Tai Viet script was said to be constructed from several scripts, namely Black Tai, White Tai, Red Tai and Lao Song, to form a universal script for use in Vietnam, Laos and Thailand. The result of the Tai Viet character set, “is focused on the use of the script by the Tai Dam of Sơn La Province, Vietnam”, “contains the traditional Sơn La character set as a whole, plus three pairs of

aspirated consonants (note: high/low kho, cho and pho) required by the Tai Dón language of Lai Châu Province". [L2/08–217 \(Brase, 2008\)](#) further analyzed the Tai Don writing systems and concluded that the 13 extra characters should be disunified and encoded, and mentioned that, "Other readers may wish to argue for the disunification of other glyphs, or for the disunification of the entire Tai Don/Jinping script from Tai Viet. All such contributions and advice are earnestly sought".

From China's perspective, we agree with the latter opinion: to disunify Tai Xaau (the "Jinping script") to Tai Viet. The main reasons are:

Style difference. The digital fonts that we have collected and which support Tai Viet include [Unifont](#) (and [Unifont Smooth](#)), [Noto Sans Tai Viet](#), [Tai Heritage Pro](#), and [TaiViet](#). We have also collected digital fonts that support Tai Xaau; see [Appendix A.3](#) and [this website](#) for more information. As can be seen, these font styles do not overlap; the style of Tai Xaau's digital font is not found in Tai Viet's, and vice versa. It has been noted that the digital fonts for Tai Xaau are trending towards the handwriting styles using hard and soft pens. There are similar handwriting styles in Tai Viet, as seen in the [Origin Myth in Tai Dam](#), suggesting a potential common style based on handwriting.

As there is currently no common font style for China and Vietnam users, we are aware of potential font implementation issues that could arise from unifying Tai Viet and Tai Xaau. As Tai Viet was encoded earlier, users have expressed concerns about the lack of localization of common characters.

Glyph difference. We refer to the following three materials: (1) [L2/08–217 \(Brase, 2008\)](#) analyzed the differences between Tai Viet ("Existing Tai Viet") and Tai Xaau ("Jinping Dai") using a sans-serif font. There are some issues with the glyphs, such as loops appearing at the turns of strokes, which are not recognized by the Tai Xaau community. (2) The Tai Xaau community has conducted glyph comparisons; see [this website](#). The main issue with this comparison lies in the description and comparison of the phonemes of Tai Dam and Tai Xaau languages. (3) [Dao and Luo \(2025\)](#) provide a brief description of the unique letters of Tai Viet and Tai Xaau.

We then provide a comparison between Tai Viet and Tai Xaau based on these three materials. The first and the second columns show the Tai Viet glyphs in *TaiViet* (also in the Code Charts) and [L2/08–217 \(Brase, 2008\)](#). The third and the fourth columns show the Tai Xaau glyphs in *Xiaorui* and [L2/08–217 \(Brase, 2008\)](#). The fifth column provides the explanation. Gray glyphs indicate that the glyphs listed by [L2/08–217 \(Brase, 2008\)](#) in the "Jinping Dai" column are not credible.

Please note that the comparison in this table is purely glyph-dependent. The focus is on whether two glyphs are written the same way rather than on whether they correspond to the same phoneme. For instance, the Tai Viet letter  TAI VIET LETTER HIGH PO and the Tai Xaau letter  LOW MO represent unrelated phonemes, yet they are placed on the same line because they are written in the same way. Additionally, 'No Tai Viet correspondence' does not imply the absence of Tai Viet letters that record the same phoneme; rather, it signifies the absence of letters written in the similar way.

Tai Viet		Tai Xaau		Note
TaiViet	Brase	Xiaorui	Brase	
ø	ø	ø	ø	Different. Tai Xaau requires an open counter.
ø	ø	ø	ø	Different. Tai Xaau requires an open counter and a separate stroke.
n	n	n	n	Same.
ø	ø	n	n	Different. The Tai Viet shape is unrecognizable.
		ø	ø	There is no Tai Viet correspondence.
ʒ	ʒ	ŋ	n	Different. Tai Xaau requires a vertical stroke start.
vñ	vñ	vñ	vñ	Different. Tai Xaau requires a loop stroke start and no loop stroke end.
ø	ø	ø	ø	Similar. Tai Xaau requires a closed counter.
u	u	ꝝ	ꝝ	Different. The Tai Viet shape is unrecognizable.
ꝝ	ꝝ	ꝝ	w	Different. The Tai Viet shape is unrecognizable.
		w	w	There is no Tai Viet correspondence.
		w	w	There is no Tai Viet correspondence.
		w	w	There is no Tai Viet correspondence.
ꝝ	ꝝ	ꝝ	ꝝ	Similar. The circumflex shape can be found in the Tai Xaau font, but is not standard.
m	m	m	m	Different. Tai Xaau requires a vertical stroke start and a leftward stroke end.
u	u	u	u	Different. Tai Xaau requires a vertical stroke start and a leftward stroke end.
ꝝ	ꝝ	ꝝ	ꝝ	Different. Tai Xaau requires a vertical stroke start.
		w	w	There is no Tai Viet correspondence.
vñ	vñ	vñ	vñ	Different. Tai Xaau requires no loop shape.

u	↙	↙	↙	Different. Tai Xaaу requires no loop shape.
v	↙	↙	↙	Different. Tai Xaaу requires a turn stroke. The Tai Viet shape will be misrecognized.
	↖	↖	↖	There is no Tai Viet correspondence.
ū	Ԁ	Ԁ	Ԁ	Different. Tai Xaaу requires no loop shape. They also record unrelated phonemes.
	↖	↖	↖	There is no Tai Viet correspondence.
	⤙	⤙	⤙	There is no Tai Viet correspondence.
w	ԝ	ԝ	ԝ	Same. The shapes evolve to be the same, despite the different phonemes.
ڻ	ڻ	ڻ	ڻ	Different. Tai Xaaу requires no loop shape. They also record unrelated phonemes.
ڽ	ڽ	ڽ	ڽ	Different. Tai Xaaу requires no loop shape.
u	↙	↙	↙	Same.
ԝ	ԝ	ԝ	ԝ	Same.
ڻ	ڻ	ڻ	ڻ	Different. Tai Xaaу requires a loop shape.
ڻ	ڻ	ڻ	ڻ	Different. Tai Xaaу requires the descender.
ڻ	ڻ	ڻ	ڻ	Different. Tai Xaaу requires a loop shape.
ڻ	ڻ	ڻ	ڻ	Different. Tai Xaaу requires a curved stroke start.
	۾	۾	۾	There is no Tai Viet correspondence.
ڻ	ڻ	ڻ	ڻ	Different. Tai Xaaу requires no loop shape.
ڻ	ڻ	ڻ	ڻ	Different. Tai Xaaу requires a loop shape and a vertical stroke.
o	o	o	o	Same.
	ڳ	ڳ	ڳ	There is no Tai Viet correspondence.

				Same.
				Different. Tai Xaaу requires no loop shape.
				Different. Tai Xaaу requires a comma shape below the letter.
				There is no Tai Viet correspondence.
				There is no Tai Viet correspondence.
1	1	,	1	Similar. Tai Xaaу requires a smaller shape.
				There is no Tai Viet correspondence.
				There is no Tai Viet correspondence. This mark appears in and it is different from / . Tai Xaaу requires no loop shape.
				Similar. Tai Xaaу requires the caron shape.
				Same.
				Same.
				Same. Though they record different phonemes.
“	“	“	“	Different. Tai Xaaу requires thw loop shapes, the <i>TaiViet</i> glyph is preferred.
				There is no Tai Viet correspondence.
				Different.
				Different. Tai Xaaу requires a dot shape.
((((Same.
				There is no Tai Viet correspondence.
				Different. Tai Xaaу requires no loop shape.
				Same. Though they record different phonemes.

			Different.
			There is no Tai Viet correspondence.
			There is no Tai Viet correspondence.
			There is no Tai Viet correspondence.
			There is no Tai Viet correspondence.

Of the 44 consonant letters, five are identical and two are similar to those in the Tai Viet alphabet. Of the 18 vowel letters and marks, seven are identical and three are similar to those in Tai Viet. Of the two tone marks, one is identical to those used in Tai Viet. All the symbols and punctuation differ from those used in Tai Viet. The above comparison table shows that the vast majority of Tai Xaau letters are written differently from Tai Viet. These different spellings are not found in Tai Xaau fonts and are not accepted by users.

Similar cases. The Tai Xaau community and researchers believe that the differences between Tai Viet and Tai Xaau are similar to those between Thai and Lao. At the glyph level, such differences are greater than those between Kannada and Telugu, and also greater than some of the differences between Grantha and Tamil. For scripts with different shapes, the identity of the user group is more important, and surveys in China show that there are differences in identity between users of Tai Xaau and Tai Viet, as described in [Dao and Luo \(2025\)](#).

Based on the differences in font styles, glyph shapes and user identity, this proposal recommends disunifying Tai Xaau to Tai Viet.

2.2 Encoding model

The presence of pre-base vowel letters in the Tai Xaau script, similar to those found in Tai Tham and New Tai Lue, allows for the consideration of different encoding models, namely those based on visual and logical order. Following several meetings and discussions, this document proposes a model based on visual order.

The main reason for choosing visual order is that all consonants in the Tai Xaau script behave identically to base characters. Unlike many Brāhmī model-based scripts, the Tai Xaau script is not rich in consonant conjuncts. This means that even when a control character is introduced as a vowel killer, it plays no role and causes confusion.

Additionally, as will be discussed later, the vowel letters and tone marks used as combining marks can be placed more flexibly because their only function is to ensure that the whole syllable can be distinguished from the others. Using visual order simplifies the support of the many possible positions of these combining marks.

2.3 Character names

The Latinization of the Tai Xaau phonology has been determined for use in the character names, as shown below.

/b/	/d/	/f/	/h/	/k/	/kʰ/	/l/	/m/	/n/	/ŋ/	/ɲ/
B	D	F	H	K	KH	L	M	N	NG	NY
/p/	/pʰ/	/ʔ/	/s/	/t/	/tʰ/	/ts/	/tsʰ/	/v/	/x/	/j/
P	PH	Q	S	T	TH	TS	TSH	V	X	Y
/kʷ/	/xʷ/	/ŋʷ/	/hʷ/	/kʰʷ/	/ʔʷ/					
KW	XW	NGW	HW	KHW	QW					
/a/	/a:/	/i/	/e/	/ɛ/	/ɔ/	/o/	/u/	/u:/	/ə/	
A	AA	I	E	AE	O	OA	U	UE	EI	

A and AA. For closed syllables, the phoneme /a/ has long and short oppositions. In some documents it is written as /a/ and /a:/, in others as /ă/ and /a/, and in this document, they are transcribed as A and AA. For open syllables, the phoneme /a/ has no long and short oppositions and is transcribed as A.

2.4 Consonant letters

There are 44 consonant letters:

ጀ HIGH QO	ጀጀ HIGH HO YO	ጀጀጀ HIGH HO MO	ጀጀጀጀ HIGH HO VO
ጀ LOW QO	ጀጀ LOW YO	ጀጀጀ LOW MO	ጀጀጀጀ LOW VO
ጀ HIGH KO	ጀጀ HIGH TO	ጀጀጀ HIGH FO	ጀጀጀጀ HIGH KHO
ጀ LOW KO	ጀጀ LOW TO	ጀጀጀ LOW FO	ጀጀጀጀ LOW KHO
ጀጀ HIGH XO	ጀጀጀ HIGH THO	ጀጀጀ HIGH BO	ጀጀጀጀ HIGH TSHO
ጀጀ LOW XO	ጀጀጀ LOW THO	ጀጀጀ LOW BO	ጀጀጀጀ LOW TSHO
ጀጀጀ HIGH HO NGO	ጀጀጀጀ HIGH HO NO	ጀጀጀጀ HIGH HO LO	ጀጀጀጀጀ HIGH HO NYO
ጀጀጀ LOW NGO	ጀጀጀጀ LOW NO	ጀጀጀጀ LOW LO	ጀጀጀጀጀ LOW NYO
ጀጀጀጀ HIGH TSO	ጀጀጀጀ HIGH PO	ጀጀጀጀ HIGH HO	
ጀጀጀጀጀ LOW TSO	ጀጀጀጀጀ LOW PO	ጀጀጀጀ LOW HO	
ጀጀጀጀጀ HIGH SO	ጀጀጀጀጀ HIGH PHO	ጀጀጀጀጀ HIGH DO	
ጀጀጀጀጀ LOW SO	ጀጀጀጀጀ LOW PHO	ጀጀጀጀጀ LOW DO	

High consonant letters with “ho”. There are seven high consonant letters with “ho” in their character names, because the characters are named according to how people pronounce these letters. For example, **ጀ** HIGH QO is pronounced /to³³?ɔ³³/, **ጀ** LOW QO is pronounced /to³³?ɔ⁴³/, **ጀ** HIGH KO is pronounced /to³³kɔ³³/, **ጀ** LOW KO is pronounced /to³³kɔ⁴³/, and so on. And for the seven letters, for example, **ጀጀጀ** HIGH HO NGO is pronounced as /hɔ³³ŋɔ³³/, **ጀጀ** HIGH HO YO is pronounced as /hɔ³³jɔ³³/, and so on. /to³³/ refers to a classifier, and therefore does not appear in character names. /hɔ³³/ indicates that the first part of these letters comes from the letter **ጀ** HIGH HO.

Labialization indicator. The consonant letter **ጀ** LOW VO is also used for indicating labialized consonant. For example, in the word **ጀጀጀጀ** (kwaen) “loosen”, **ጀጀ** is the consonant cluster for /kʷ/ (if the inherited vowel is not considered). For a Brāhma model, this consonant cluster would need to be encoded as <**ጀ** HIGH KO, virama, **ጀ** LOW VO>, but it is indistinguishable from <**ጀ** HIGH KO, **ጀ** LOW VO>. People pronounce this consonant cluster as /kʷa³³/ (kwa), because when people pronounce it with /ɔ/ (o), they find that the labialization is not reflected (/kʷɔ³³/ ~ /kɔ³³/), so they switch to using /a/.

High Qo. The consonant letter **ጀ** HIGH QO is also used as a vowel letter for /ɔ/. For example, in the word **ጀጀጀ** (pod) “lung”, **ጀ** HIGH QO is used for /ɔ/.

Consonants for coda. There are eight consonant letters that are used as a coda in syllables, they are: **ጀጀ** LOW YO, **ጀጀጀ** LOW VO, **ጀጀጀጀ** LOW NGO, **ጀጀጀጀጀ** LOW NO, **ጀጀጀጀጀጀ** LOW MO, **ጀጀጀጀጀጀጀ** HIGH KO, **ጀጀጀጀጀጀጀ** HIGH DO, and **ጀጀጀጀጀጀጀጀ** HIGH BO. They are used in syllables that end with /i/ (or /j/), /u/ (or /w/), /ŋ/, /n/, /m/, /k/, /t/, and /p/.

Initials. There are two types of initials in Tai Xaau, those using non-labialized single consonants, which use the 44 consonants mentioned above, and those using labialized single consonants, which do not appear in the modern texts but do appear in pre-modern literature. Eleven consonants (high/low ko, xo, ngo, ho and kho, plus high qo) have been identified that can be followed by a labialization mark, but it should be assumed that all consonants with a labialization mark constitute legal strings.

2.5 Vowel letters and vowel marks

There are 7 vowel letters and 11 vowel marks (presented with dotted circle):

• MAAI KA-1	○ MAAI KI	○ MAAI KU-1	✓ MAAI KAUE
○ MAAI KA-2	○ MAAI KE	○ MAAI KU-2	✓ MAAI KAU
○ MAAI KA-3	〃 MAAI KAE	○ MAAI KU-3	✓ MAAI KAI
✓ MAAI KA-4	○ MAAI TSAM	○ MAAI KUE	
○ MAAI KA-5	✓ MAAI KOA	○ MAAI KEI	

Maai Ka. There are one vowel letter and four vowel marks that are pronounced as *maai ka*, and they can be grouped into two categories. • MAAI KA-1 and ○ MAAI KA-2 can be used in open syllables. Note that the vowel mark ○ MAAI KA-2 can only be used in open syllables with tone 3, and the vowel letter • MAAI KA-1 can also been used in closed syllables for long /a/. The other three vowel marks ○ MAAI KA-3, ○ MAAI KA-4, and ○ MAAI KA-5 can only be used in closed syllables. Since there is no opposition of long and short /a/ in open syllables in Jinping dialect, they are all pronounced *maai ka*.

The three vowel marks ○ MAAI KA-3, ○ MAAI KA-4, and ○ MAAI KA-5 are used with specific and complementary coda letters. ○ MAAI KA-3 is combined with ✓ LOW NO or ✓ HIGH DO to form ↗/an/ or ↗/at/. ○ MAAI KA-4 is combined with ↗ LOW NGO or ↗ HIGH KO to form ↗/an/ or ↗/ak/. ○ MAAI KA-5 is combined with ↗ LOW MO or ✓ HIGH BO to form ↗/am/ or ✓/ap/. Note that the two vowel marks ○ MAAI KA-4 and ○ MAAI KA-5 are rather flexible, as they can be positioned above the consonant letters in initial and in final. It should be assumed that whatever consonant letter the two vowel marks are placed on, the character sequences corresponding to the syllables they form are equivalent. For example, the character sequences ↗n /lak⁵⁵/ is equivalent to ↗n.

Maai Kae and Maai Kau. The pre-base vowel letter 〃 MAAI KAE is used for vowel /ɛ/, as in 〃nə /kəu³³/, and the pre-base and post-base vowel letter ✓ MAAI KAU is used for vowels /au/, as in ↗/əu³³/?au³³. Because the glyphs of these two characters are very similar, it should be assumed that the character sequence of two ✓ MAAI KAU is confusable to one 〃 MAAI KAE.

Maai Ku. There are one vowel letter and two vowel marks that are pronounced as *maai ku*. ○ MAAI KU-1 can be used in any syllables. ↗ MAAI KU-2 can only be used with ↗ LOW NGO, for example, in ↗b /lub⁴³/ . ○ MAAI KU-3 can only be used with ↗ LOW MO, for example, in ↗w /tsum³³/.

Finals. All the finals in the modern text are listed in Fig. 2, which includes 9 finals with monophthongs, 14 finals with diphthongs, and 62 finals with consonant coda. Further finals appear in pre-modern literature, e.g. the single letter ↗ MAAI KU-2 and the single letter ○ MAAI KA-5 are also used as finals.

2.6 Tone marks

There are 2 tone marks:

‘ MAI SAK

‘ MAI HOI

There are eight tone classes in Jinping dialect, according to Dao et al. (2019):

	A	B	C	D
high	1 / ³³ /	2 / ⁵⁵ /	3 / ²⁵ /	7 / ⁵⁵ /
low	4 / ⁴³ /	5 / ⁵² /	6 / ³¹ /	8 / ⁴³ /

For the eight tone classes:

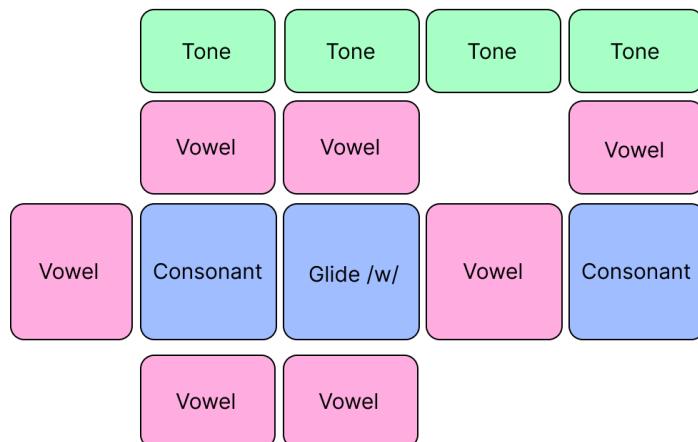

<i>n, /ka³³/</i>	<i>n HIGH KO, , MAAI KA-1</i>
<i>n, /ka⁵⁵/</i>	<i>n HIGH KO, ጀ MAI SAK, , MAAI KA-1</i>
<i>n, /ka²⁵/</i>	<i>n HIGH KO, ጀ MAI HOI, , MAAI KA-1</i>
<i>n, /ka⁴³/</i>	<i>n LOW KO, , MAAI KA-1</i>
<i>n, /ka⁵²/</i>	<i>n LOW KO, ጀ MAI SAK, , MAAI KA-1</i>
<i>n, /ka³¹/</i>	<i>n LOW KO, ጀ MAI HOI, , MAAI KA-1</i>
<i>nn /kak⁵⁵/</i>	<i>n HIGH KO, n HIGH KO, ጀ MAAI KA-4</i>
<i>nn /kak⁴³/</i>	<i>n LOW KO, n HIGH KO, ጀ MAAI KA-4</i>

As can be seen above, ጀ MAI SAK is used for tone 2 and tone 5, and ጀ MAI HOI is used for tone 3 and tone 6.

In the Tai Xaaú script, the tone is used to modify the whole syllable, so its position is relatively flexible, and in the literature, it can be added above any grapheme cluster. Therefore, it should be assumed that the resulting character sequence is equivalent regardless of the grapheme cluster to which the tone mark is added. For example, the character sequence *ጀጀጀጀ /sin⁵⁵/* is equivalent to *ጀጀጀጀጀጀ /sin⁵⁵/*.

2.7 Syllable structure

The structure of each syllable in the Tai Xaaú script can be summarized as:

The structure of a Tai Xaaú syllable can be described as OW?VC?T?, where:

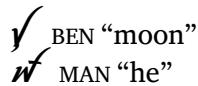

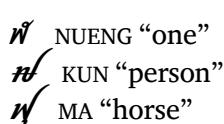

- O is a required onset, and it can be any of 44 consonant letters in section 2.4;
- W is an optional labialization indicator ሂ LOW VO;
- V is a required vowel letter or vowel mark, where , MAAI KA-1 and ✓MAAI KOA are post-base vowel letters, ✓MAAI KAU should be used twice (one pre-base and one post-base), the other four vowel letters are pre-base;
- C is an optional coda, and it can be any of the eight consonant letters as described in section 2.4; the C and V will form a ligature ሂ or ሂ, as described in section 2.5;
- T is an optional tone mark, and it can be any of two as described in section 2.6.

For examples:

word	input
/əu/ /au ³³ / "want"	/ MAAI KAU (V), ə HIGH QO (O), / MAAI KAU (V)
/nə/ /kau ²⁵ / "nine"	/ MAAI KAU (V), n HIGH KO (O), ə MAI HOI (T), / MAAI KAU (V)
/n̩/ /pau ⁵² / "who"	ə MAAI KAUE (V), n̩ LOW PHO (O), ə MAI SAK (T)
/ɛə/ /neu ³³ / "sticky"	ə HIGH HO NO (O), ə MAAI KE (V), ə LOW VO (C)
/əə/ /sɔŋ ³³ / "two"	ə HIGH SO (O), ə HIGH QO (V), ə LOW NGO (C)
/m̩n̩/ /mak ⁴³ / "love"	ə LOW MO (O), n HIGH KO (C), ə MAAI KA-4 (V)
/m̩v̩/ /mui ⁵⁵ / "drizzle"	ə HIGH HO MO (O), ə MAAI KUE (V), ə MAI SAK (T), ✓ LOW YO (C)
/hʌŋ/ /huj ⁵² / "daybreak"	ə MAAI KU-2 (V), ə LOW HO (O), ə MAI SAK (T), ə LOW NGO (C)
/ɛə/ /xʷa ³³ / "right"	ə HIGH XO (O), ə LOW VO (W), ə MAAI KA-1 (V)
/hɔ̃.t̩/ /xʷa:j ³³ / "horizontal"	ə HIGH XO (O), ə LOW VO (W), ə MAAI KA-1 (V), ə LOW NGO (C)
/uŋ/ /kʷɛŋ ³³ / "soup"	ə MAAI KAE (V), n HIGH KO (O), ə LOW VO (W), ə LOW NGO (C)
/n̩əŋ/ /kʷin ³³ / "eat"	n HIGH KO (O), ə LOW VO (W), ə MAAI KI (V), ✓ LOW NO (C)
/k̩əf̩/ /kʰwən ³³ / "scarf"	ə HIGH KHO (O), ə LOW VO (W), ✓ LOW NO (C), ə MAAI KA-3 (V)

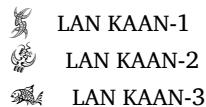

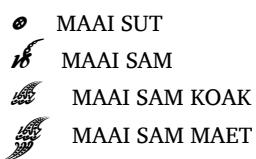

2.8 Symbols and punctuation

There are 5 symbols with specific meanings:

Note that one should use **W MAN** and should not use <**W LOW MO, Ⓜ MAAI KA-3**>. More symbols will be discovered during the subsequent literature compilation process, so we hope to reserve some codepoints for them.

There are 7 Tai Xaaū-specific punctuation that are used for indicating the end of a sentence or an article:

The rest of the punctuation is identical to that used in Han ideographs.

2.9 Collation

The syllables in the Tai Xaaú script are ordered by initials, finals and tones.

- The order of initials is from **ø HIGH QO** to **ŋ LOW NYO**, then from <**ø HIGH QO, ð LOW VO**> to <**ŋ LOW NYO, ð LOW VO**>.
- The order of finals is (where “-” refers to an initial):

*a (ø), i (ø), e (ø), ae (ø), o (ø), oa (ø), u (ø), ue (ø), ei (ø);
 ai (ø), aai (ø), oi (ø), oai (ø), ui (ø), uei (ø), eii (ø);
 au (ø), aau (ø), iu (ø), eu (ø), aeu (ø), eiu (ø);
 aue (ø);
 ang (ø), aang (ø), ing (ø), eng (ø), aeng (ø), ong (ø), oang (ø),
 ung (ø) < (ø), ueng (ø), eing (ø);
 an (ø), aan (ø), ..., ein (ø);
 am (ø), aam (ø), ..., um (ø) < (ø), ..., eim (ø);
 ak (ø), aak (ø), ..., eik (ø);
 at (ø), aat (ø), ..., eit (ø);
 ap (ø), aap (ø), ..., eip (ø).*
- The order of tones is: no tone, **ø MAI SAK, ø MAI HOI**.

Note that, the syllables recorded in the Tai Xaau script are basically the original form of the morphemes, but in spoken language, the same morphemes change when they form different words, depending on their contexts, resulting in inconsistencies between the reading forms and the written forms. For examples, when /ma⁵⁵/ “gain” appears in the first syllable of a compound word, it should be read as /m⁵⁵/, thus changing its final; or, when a syllable in tone 4 follows a syllable in tone 3, the tone value /⁴³/ will change to /⁴⁵/, as /kun⁴³/ “person” in /ha²⁵kun⁴⁵/ “five persons”.

The order of Tai Xaau characters is:

ø HIGH QO < ø LOW QO < n HIGH KO < n LOW KO < ŋ HIGH XO < ŋ LOW XO <
 ŋ HIGH HO NGO < ŋ LOW NGO < v HIGH TSO < m LOW TSO < w HIGH SO <
 w LOW SO < ŋ HIGH HO YO < v LOW YO < m HIGH TO < n LOW TO <
 n HIGH THO < ŋ LOW THO < ŋ HIGH HO NO < ŋ LOW NO < v HIGH PO <

Appendix A Glyphs comparison

A.1 Glyphs in ancient literatures

Below is a list of the glyphs used in Tai Xaa script, where “—” means unattested. Glyphs in the second to fourth columns are from [Dao et al. \(2019\)](#) [Dao], [Luo \(2017\)](#) [Luo] and [COHAP \(1989\)](#) [COHAP]. And glyphs in the remaining five columns are from ancient literatures in [POCP \(2020\)](#), they are:

- **DD:** *Dōngdēng Gùshì* 东登故事, “Story of Dongdeng (person name)”;
 - **HL:** *Hūnluó Yǔ Nánwō* 婚罗与喃窝, “Hunluo (person name) and Nanwo (person name)”;
 - **ZL:** *Zhúlóu Shíwù* 竹楼实务, “Practice of Building Bamboo Houses”;
 - **AXL:** *Aixiànglún* 艾相伦, “Aixianglun (person name)”;
 - **Others:** *Cǎiyào Pǔjì* 采药谱记, “Records of Herb Collection” and *Qínggē* 情歌, “Love Song”.

ň	ň	ň	ň	ň	ň
č	ň	ň	č	ň	ň

4. 金平傣文规范韵母

以 83 个韵母作为金平傣文的规范韵母。包含 9 个单元音、14 个双元音、60 个带辅音韵尾的韵母（简称“辅音尾韵母”）。列表 9。

表9 规范韵母

单元音		ə	ə̂	ə̄	ə̄̄	ə̄̄̄	ə̄̄̄̄	ə̄̄̄̄̄	ə̄̄̄̄̄̄	ə̄̄̄̄̄̄̄
双元音	ɔ̄									
	ɔ̄̄	ɔ̄̄̄				ɔ̄̄̄̄	ɔ̄̄̄̄̄	ɔ̄̄̄̄̄̄	ɔ̄̄̄̄̄̄̄	ɔ̄̄̄̄̄̄̄̄
	ɔ̄̄̄	ō̄̄	ə̄̄̄	ə̄̄̄̄	ə̄̄̄̄̄					ə̄̄̄̄̄̄̄̄
辅音尾韵母	ɔ̄̄̄̄	ō̄̄̄̄	ə̄̄̄̄̄̄	ə̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄̄̄̄̄̄
	ɔ̄̄̄̄̄	ō̄̄̄̄̄	ə̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄̄̄̄̄̄̄
	ɔ̄̄̄̄̄̄	ō̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄̄̄̄̄̄̄̄
	ɔ̄̄̄̄̄̄̄	ō̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄̄̄̄̄̄̄̄̄
	ɔ̄̄̄̄̄̄̄̄	ō̄̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄̄̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄̄̄̄̄̄̄̄̄̄
	ɔ̄̄̄̄̄̄̄̄̄	ō̄̄̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄̄̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄̄̄̄̄̄̄̄̄̄	ə̄̄̄̄̄̄̄̄̄̄̄̄̄̄̄̄̄̄

5. 金平傣文规范声调

以六个调位作为金平僚文的 6 个声调，3 个声调符号作为规范调符。列表 10。

表 10 规范声调

调位	一/33/	二/55/	三/25/	四/43/	五/52/	六/31/
调值	33	55	25	43	52	31
调符		, ~	,		,	,
例词	shí	shí, shí	shí	shí	shí	shí

Figure 3 Tai Xaa orthography:
 Initials [table 8], finals [table 9] and tones [table 10]
 Source: [Dao et al. \(2019\)](#), page 67

/55/、/25/、/43/、/52/、/31/。其中调位/55/包含了舒声调第2调的调值[55]和入声调第7调的调值[55]；调位/43/包含了舒声调第4调的调值[43]和入声调第8调的调值[43]。

四、特殊符号

金平傣文有一些符号较为特殊，既不是声母，也不是韵母，而是一种固定的特殊符号，专门用来书写某个词或表示句末停顿的符号。这样的符号不多，可分两类：一种是固定字符；另一种是句末符号。

(一) 固定字符

固定字符是指用一个特定的符号来表示某一个词的固定书写形式，构成独立使用的独体字。这种固定字符不多，传统文字中只出现在“一、人、月亮、马”4个词中。即

໌ [num³²] 一 ໌ [kun⁴³] 人

່ [baŋ³³] 月亮 ໌ [ma³¹] 马

计算机字体根据需要增加了2个类似的独体字。即

້ [lu⁴³] 孩子 ່ [la²⁵] 迟

上述的独体字也可以用声韵调拼合的方式书写，如：໌(一)、໌(人)、່(月亮)、໌(马)、້(孩子)、່(迟)。使用时可根据需要选择使用独特字或声韵调拼合的字。

(二) 句末符号

金平傣文一般不使用标点符号，每一句话结束时就在后面标注一个句末符号。但并没有固定用哪一个字符，大多因人而异。有的字符与其说是字，不如说是图画，有的字形类似象形文字。句末符号有如下6个。即

其中，前5个均统称为[ma: i³³ sam³¹]，有“结束符号”之意，通常用在长篇的故事或诗歌里。最后一个称为[ma: i³³ mev⁵⁵]，有“完成符号”之意，用在句子之后，表示一句话的完成。

五、结语

综上所述，金平傣文是一种源于印度梵文字母系统的拼音文字，也是跨境自称“傣端”或“傣皓”的傣族白傣支系使用的民族文字。该文字由于创制的年代久远，与现行口语在声母、韵母、声调等方面都出现了一定的差异。加之长期以来均通过手抄方式流传于民间，字体形式因人而异，既没有规范的字体，也没有计算机字体，这对跨境傣族语言文化的传承和发展带来了不利的影响。文字是一个民族进步的标志性特征之一，它对推动民族文化的发展起到积极的作用。尤其是当今数字化、信息化的时代，文字所发挥的作用更加具有不可替代性。为了能更好保护与传承优秀的民族文化，本文通过对金平傣文的实地调查，并根据现行口语的语音特征，对其语音的规范化问题进行了探讨，并提出金平傣文语音规范化的基本原则和标准。具体归纳总结表8。

1. 金平傣文规范字体

以金平县融媒体中心罗文斌同志所设计的金平傣文计算机字体小睿体作为金平傣文数字化、信息化的规范字体。该字体包含了在传统文字符号基础上所设计的字体和为完整记录现行语言而新增的文字符号字体。

2. 金平傣文标准音

以金平县勐拉镇旧勐村的白傣语语音作为金平傣文的标准音。该村落的历史文化、地理位置、语音特点，符合标准选择的一般原则。

3. 金平傣文规范声母

以22个辅音音位44个傣文字母作为金平傣文的规范声母。列表8。

Figure 4 Tai Xaau orthography:
Symbols [section 4.1], punctuation [section 4.2]
Source: Dao et al. (2019), page 68

This image shows a single page from a handwritten manuscript in the Tai Xaa language. The text is written in a cursive script. Three distinct punctuation marks are used: a horizontal bar (—), a vertical bar (|), and a dot (·). The text discusses the history of the Tai Xaa language and its literature.

This image shows a single page from a handwritten manuscript in the Tai Xaa language. The text is written in a cursive script. A large number of small, illegible characters are present, likely representing a list or a dense text block.

Summary Form

**ISO/IEC JTC 1/SC 2/WG 2
PROPOSAL SUMMARY FORM TO ACCOMPANY SUBMISSIONS
FOR ADDITIONS TO THE REPERTOIRE OF ISO/IEC 10646**

Please fill all the sections A, B and C below. Please read Principles and Procedures Document (P&P) from unicode.org/wg2/principles.html for guidelines and details before filling this form.
Please ensure you are using the latest Form from unicode.org/wg2/summaryform.html. See also unicode.org/roadmaps for latest Roadmaps.

A. Administrative

1. Title:	<i>Proposal to encode the Tai Xaaú script in UCS</i>
2. Requester's name:	<i>China National Body</i>
3. Requester type (Member body/Liaison/Individual contribution):	<i>Member body contribution</i>
4. Submission date:	<i>June 16, 2025</i>
5. Requester's reference (if applicable):	
6. Choose one of the following: This is a complete proposal:	<i>yes</i>
(or) More information will be provided later:	

B. Technical – General

1. Choose one of the following: a. This proposal is for a new script (set of characters): Proposed name of script:	<i>Tai Xaaú</i>	<i>yes</i>
b. The proposal is for addition of character(s) to an existing block: Name of the existing block:		<i>no</i>
2. Number of characters in proposal:		<i>76</i>
3. Proposed category (select one from below - see section 2.2 of P&P document): A-Contemporary <input checked="" type="checkbox"/> B.1-Specialized (small collection) <input type="checkbox"/> B.2-Specialized (large collection) <input type="checkbox"/> C-Major extinct <input type="checkbox"/> D-Attested extinct <input type="checkbox"/> E-Minor extinct <input type="checkbox"/> F-Archaic Hieroglyphic or Ideographic <input type="checkbox"/> G-Obscure or questionable usage symbols <input type="checkbox"/>		
4. Is a repertoire including character names provided? a. If YES, are the names in accordance with the “character naming guidelines” in Annex L of P&P document?		<i>yes</i>
b. Are the character shapes attached in a legible form suitable for review?		<i>yes</i>
5. Fonts related: a. Who will provide the appropriate font to the Project Editor of 10646 for publishing the standard? <i>Chen Zhuang</i>		
b. Identify the party granting a license for use of the font by the editors (include address, e-mail, ftp-site, etc.): <i>Chen Zhuang, chenzh-zhuang@163.com</i>		
6. References: a. Are references (to other character sets, dictionaries, descriptive texts etc.) provided? b. Are published examples of use (such as samples from newspapers, magazines, or other sources) of proposed characters attached?		<i>yes</i>
7. Special encoding issues: Does the proposal address other aspects of character data processing (if applicable) such as input, presentation, sorting, searching, indexing, transliteration etc. (if yes please enclose information)?		<i>no</i>
8. Additional Information: Submitters are invited to provide any additional information about Properties of the proposed Character(s) or Script that will assist in correct understanding of and correct linguistic processing of the proposed character(s) or script. Examples of such properties are: Casing information, Numeric information, Currency information, Display behavior information such as line breaks, widths etc., Combining behavior, Spacing behavior, Directional behavior, Default Collation behavior, relevance in Mark Up contexts, Compatibility equivalence and other Unicode normalization related information. See the Unicode standard at www.unicode.org for such information on other scripts. Also see Unicode Character Database (www.unicode.org/reports/tr44) and associated Unicode Technical Reports for information needed for consideration by the Unicode Technical Committee for inclusion in the Unicode Standard.		

C. Technical - Justification

1. Has this proposal for addition of character(s) been submitted before?	<i>no</i>
If YES, explain:	
2. Has contact been made to members of the user community (for example: National Body, user groups of the script or characters, other experts, etc.)?	<i>yes</i>
If YES, with whom? <i>Dai people lived in Yunnan Province, PRC</i>	
If YES, available relevant documents: <i>this document</i>	
3. Information on the user community for the proposed characters (for example: size, demographics, information technology use, or publishing use) is included?	<i>yes</i>
Reference: <i>this document</i>	
4. The context of use for the proposed characters (type of use; common or rare)	<i>common</i>
Reference:	
5. Are the proposed characters in current use by the user community?	<i>yes</i>
If YES, where? Reference: <i>Jinping Miao, Yao, and Dai Autonomous County, Honghe Hani and Yi Autonomous Prefecture, Yunnan Province, PRC.</i> <i>(中华人民共和国云南省红河哈尼族彝族自治州金平苗族瑶族傣族自治县)</i>	
6. After giving due considerations to the principles in the P&P document must the proposed characters be entirely in the BMP?	<i>no</i>
If YES, is a rationale provided?	
If YES, reference:	
7. Should the proposed characters be kept together in a contiguous range (rather than being scattered)?	<i>yes</i>
8. Can any of the proposed characters be considered a presentation form of an existing character or character sequence?	<i>no</i>
If YES, is a rationale for its inclusion provided?	
If YES, reference:	
9. Can any of the proposed characters be encoded using a composed character sequence of either existing characters or other proposed characters?	<i>no</i>
If YES, is a rationale for its inclusion provided?	
If YES, reference:	
10. Can any of the proposed character(s) be considered to be similar (in appearance or function) to, or could be confused with, an existing character?	<i>yes</i>
If YES, is a rationale for its inclusion provided?	
If YES, reference: <i>this document, section 2.1 (relations with Tai Viet)</i>	
11. Does the proposal include use of combining characters and/or use of composite sequences?	<i>yes</i>
If YES, is a rationale for such use provided?	
If YES, reference: <i>combining characters are an inherent part of the script</i>	
Is a list of composite sequences and their corresponding glyph images (graphic symbols) provided?	
If YES, reference:	
12. Does the proposal contain characters with any special properties such as control function or similar semantics?	<i>no</i>
If YES, describe in detail (include attachment if necessary): _____	
13. Does the proposal contain any Ideographic compatibility characters?	<i>no</i>
If YES, are the equivalent corresponding unified ideographic characters identified?	
If YES, reference:
