

Type: Working Group Document
Title: Feedback to N5306
Source: TCA and China
Reference: [N5306](#), [N5312](#)
Date: 2025-06-12

TCA has carefully reviewed document N5306. This document mainly provides comments on two parts of N5306: "**Consolidated list of 19 variant sets**" and "**Consolidated table to study disunification cases**".

Summary:

1. [Appendix 1](#): Regarding "Consolidated list of 19 variant sets", the response comments in this part replace [N5312](#) Part 1 (N5294R3 - 17 variant sets of processing suggestions).
2. [Appendix 2](#): Regarding "Consolidated table to study disunification cases",
 - A. Among the total **457** (including three items numbered 161) cases, TCA and China recommend that 200 cases with C-, K-, or D- sources be encoded separately.
 - B. For disunification or unification principles, please refer to WG2 N5307R.
 - C. Several cells in the table are color-highlighted to indicate the following:
 - **Yellow highlight**: Mentioned in the document "Feedback to N5294R2 & N5294R3."
 - **Orange highlight**: Mappings for some entries need to be moved.
 - **Green highlight**: THX glyph correction needed.

A total of six glyphs need to be corrected because their current forms do not match the intended interpretation.

Four glyphs (No. 58, 357, 362, 367) are already listed in Appendix 2 of the "Feedback to N5294R2 & N5294R3" document.

The remaining two (No. 14 and 206) will be corrected based on the shape of the character " 𪛗 (毒)".

Appendix 1-19 variant sets of processing suggestions

Note: **Red square** = code point change; **Blue square** = should be removed
