Title: Feedback to N5341
Source: TCA and China
Reference: N5307R, N5317R,
Date: N5341 2025-10-03

Regarding the N5341 new code chart, Small Seal Script experts from TCA and China have reviewed the yellow-highlighted sections and provided the following recommendations and explanations. Additionally, after experts were asked to complete a comprehensive review of corresponding modern CJK unified ideographs, 3,121 entries were finally corrected. The reason for these adjustments is that we have adopted CJK character forms that most closely resemble the Small Seal Script forms, whereas the previously corresponding modern Chinese characters used more commonly used CJK characters, which look very different from the Small Seal Script forms. The meanings of the two CJK character forms are the same.

The details are as follows:

Part 1- The yellow-highlighted code points in N5341

This involves 43 code points , categorized into 3 main types. For complete details, please refer to Appendix 1.

1. Code point adjustments:

New code points should be uniformly encoded after the THX version. A total of 24 code points require adjustment.

2. Code point deletions :

- (1) Based on Unification Principle 2.(5) in N5307R, these should be moved back to their original code points without requiring separate encoding. A total of 11 code points.**

The experts re-examined 457 character groups according to N5307R (Mapping Principles). The most significant change involves the handling of phono-semantic compounds. We believe that existing Unification Principle 2.(5) should apply to all variant forms of such characters, regardless of their top-bottom or left-right structural arrangements. This

approach will establish consistent standards for future character addition applications. Therefore, 11 code points must be moved back to their original code points without requiring separate encoding.

(2) Duplicate encoding: 1 code point.

The D-07763 form of U+3A01B is identical to U+3A15A, therefore U+3A01B should be deleted.

3A01A	𠄎 410 藏 240F4	TH-07775	C-08062	K-07790
3A01B	𠄎 410 藏 240F4	CKD-3A01B		D-07763
3A15A	𠄎 410 藏 6FCA	TH-08085	C-08372	K-08096

3. Glyph mapping adjustments:

Other version (CCZ, QJZ, DYC) mapping changes: 8 code points.

※Special notes:

➤ U+3806E

3806D	王 6* 玉 7389	TH-00099	C-00103	K-00104	D-00099
3806E	王 6 王 738A	CKD-3806E			D-00122
38086	王 6 璿 7491	TH-00123	C-00127	K-00128	D-00121
38087	王 6 璿 730B	TH-00124	C-00128	K-00129	
38088	王 6 璿 74BF	TH-00125	C-00129	K-00130	D-00123

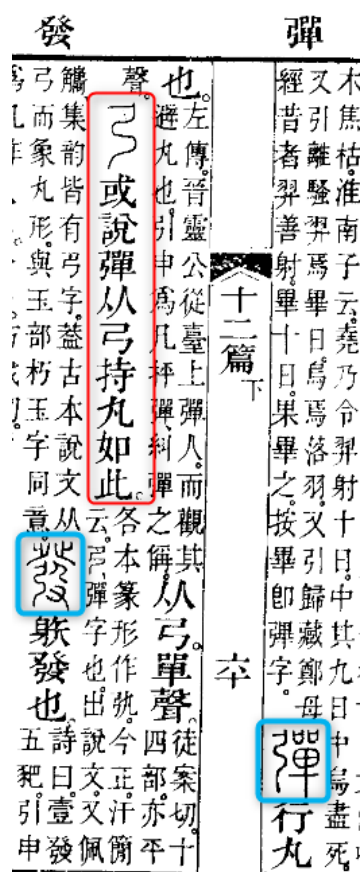

Although the D-00122 (王) form resembles the U+3806D form, their pronunciations and meanings are completely different. According to DYC, the D-00122 character form is annotated as "玉也。从王有點。讀若畜牧之畜。各本篆文作璿," which shares the same meaning as "璿". Moreover, according to the "Coding sequence" in N5318R, characters should be arranged in the order they appear in the THX edition. For those without correspondence, they should be inserted sequentially. In DYC, D-00122 (王) appears after U+38086 (璿), so it

should be encoded after U+38087 (琿).

➤ 3A5E8

➤ 1 code point with missing Modern CJK

NO	Codepoint	N5341-Small Seal Code charts	note
1.	39DA4		Modern CJK:U+2C279 炙

➤ 1 code point with incorrect radical

NO	Codepoint	N5341-Small Seal Code charts	note
2.	3AB98		U+3AB98 Radical→513

➤ The THX column for the newly disunified entries: 187 characters.

-Font file: other version_187_0901.ttf (TXT for editing; PDF with glyphs and encoding positions for review)

-N5317R3 adds 199 characters. After deleting 12 code points per Part 1, Item 2 of this document, the total is revised to 187 characters.

➤ **N5307R Revision**

The example "藹" in N5307R Section 3.(2) should be replaced with "曄" for clarity. We will update this Mapping Principles document and revise all examples to use new code points once the updated code chart is released.

Part 2- Modern CJK in N5341

3,121 entries require adjustment for corresponding modern CJK. Modification lists are provided in Excel and PDF formats for easy review (see Appendix 2).

Appendices:

1. Issues with N5341 code points
2. Modern CJK modification list
3. TrueType Font File (other version_187_0901.ttf)
